Find your edge with customizable controls and swappable profiles that can help equip you for anything from pro level tournaments to epic single player adventures.

Ultra-customizable controls

Custom settings make your DualSense Edge wireless controller uniquely yours. Discover some of the controller's key features via the pulsing icons below:

Changeable stick caps

Three types of changeable stick caps help you stay comfortable in-game without sacrificing grip or stability.

On-controller user interface

Quickly swap between your pre-set control profiles and adjust game volume and chat balance from the controller’s dedicated function button.

Replaceable stick modules

Play for longer with swappable replacement stick modules available to purchase separately.

Adjustable trigger lengths

Manually set the travel distance of your left and right triggers for an optimal experience with whatever you’re playing.

USB braided cable with lockable connector housing

Lock your USB in place so it's much less likely to slip out at a crucial moment.

Mappable back buttons

Two swappable sets of back buttons, configurable to any other button input, put essential controls at your fingertips.

Personalized control profiles

Quick access profile settings menu

Simply press the Fn button and Options button while in game to open the customization menu, where you can quickly change your settings.

Remappable buttons

Customize the control layout of your favourite games so the commands you need are always exactly where you want them to be. Save your button configurations to your player profile and switch between them without leaving your game.

Adjustable triggers, stick sensitivity & vibration intensity

Configure your stick sensitivity, stick dead zones, and trigger dead zones for finely tuned inputs, and even set your vibration intensity for a completely customized play experience.

Quick-swap control profiles

Once you've found your ideal control settings, you can save them to unique profiles and swap between them on-the-fly, so your favourite configurations are always ready when you are.
