

FSP U500-B Case Full Tower mITX, mATX, ATX, E-ATX, CEB, EEB Black

Model: POC0000260

Manufacturer: FSP GROUP

EAN: 4711498480859

Product Code: 1080795

R3,927

Aesthetics Meet High Performance

The U500 is a workstation-grade case that combines a sleek, minimalist design with powerful performance. Whether you’re overclocking or running demanding applications, it delivers stable and efficient cooling for maximum system reliability.

Unique Dual-Function Graphics Cards Holder

A dual-purpose design that adapts to different GPU sizes, securely locks the card in place to prevent sagging or slipping, while also serving as a dual graphics card holder for enhanced stability.

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Unleash the Graphics Cards Power

The U500 is engineered to handle the intense workloads and computing demands of high-performance workstations.

Precision Cooling Redefined

The U500 boasts a digital fan speed display for real-time monitoring and dynamic speed adjustment, delivering reliable performance even under demanding workloads. It comes equipped with five 120mm PWM fans, ensuring efficient cooling performance.

High Capacity and Ultimate Compatibility

With its spacious interior, the U500 is designed to support a wide range of motherboards, including E-ATX, ATX, M-ATX, and Mini-ITX. It also accommodates dual high-end graphics cards, making it the perfect choice for powerful, versatile builds.

Ultimate Cooling Power

Experience unmatched cooling efficiency with our cutting-edge PC case design. This case ensures optimal airflow to keep your system running at peak performance.

Unleash Extreme Cooling: 480mm Radiator Support

Designed for ultimate thermal performance, this PC case supports a 480mm radiator, offering superior heat dissipation for high-performance builds.
