R5,159

Roborock Q10 PF Cleaning Robot (black)

Roborock Q10 PF is a powerful cleaning robot that will take care of the pristine cleanliness of your home's floors. With a suction power of up to 10,000 Pa, it deals with dust and other dirt in no time, and its LDS navigation allows it to quickly and accurately map rooms. The device can also avoid obstacles and is compatible with the Roborock app, which provides convenient access to many useful features. In addition, the Auto Lifting Mopping System allows the mopping module to lift automatically, so you don't have to worry about getting your carpets wet while cleaning.

Reliable support in the fight against dirt

The robot offers an impressive suction power of up to 10,000 Pa. This means it can easily handle even stubborn dirt - it will quickly remove dust, kitchen crumbs, hair, hair hidden in the dense fibers of the carpet and dirt accumulated in crevices in the floor. It will be an excellent choice for pet guardians, parents of young children, allergy sufferers and more!

Double tangle prevention

The Q10 PF is equipped with a V-shaped main brush that has rubber elements, bristles and a small JawScrapers comb. Its side brush, on the other hand, is distinguished by its asymmetrical design, soft rubber baffle and elongated bristles. All this effectively prevents tangles and ensures that dirt goes exactly where it should.

Thorough floor cleaning

The Q10 PF robot allows you to wash floors thoroughly and lets you choose from three levels of water flow. So you can adjust its performance to your current needs! An additional advantage of the robot is the Auto Lifting Mopping System technology, thanks to which the mopping module automatically lifts to a height of about 8 mm after cleaning or when it detects the carpet. Such a solution avoids getting carpets wet and re-contaminating the floors that have just been cleaned!

It is not afraid of obstacles

Thanks to structured lighting technology and infrared camera, the robot effectively detects and avoids various kinds of obstacles, such as, for example, slippers, pillows or toys. Don't be afraid of hitting something! Roborock Q10 PF can easily navigate even through cluttered rooms.

Reliable navigation, No-Go zone suggestions

Roborock Q10 PF uses an advanced LDS navigation system to quickly map rooms and plan the most optimal cleaning routes. It allows you to save up to three different maps - great for storied homes, too. In addition, the device detects potentially problematic areas, such as the space near the stairs or between chair legs. Then, based on this, it suggests where to set up a No-Go zone that it won't access. This way you don't have to worry about the robot falling or getting blocked somewhere!

Try out the features available in the app

The robot is compatible with the Roborock app, which allows you to conveniently change settings and use available functions. With just a few clicks, for example, you can direct the device to re-clean a designated area, enable automatic power boost on carpets or activate the DEEP+ intensive
