

InLine 16681S power cable Black 1 m CEE7/16

Model: 16681S

Manufacturer: INLINE

EAN: 4043718336029

Product Code: 1081502

R820

Reliable power supply: The Euro extension cable enables the safe connection of protection class II devices in professional environments.

Versatile: Ideal for use in IT system environments, AV technology, repair workshops or production facilities.

Robust workmanship: The moulded plugs ensure a long-lasting connection and reduce potential contact problems.

Tested safety: The technical design complies with current European standards for professional use.

Space-saving design: The 2-pin Euro plug makes the cable ideal for compact connection solutions.

The InLine® Euro extension cable offers a reliable and standard-compliant solution for supplying power to electrical devices in protection class II. With its 2-pin Euro plug (CEE 7/16) and matching Euro socket, this cable is ideal for professional use in IT system environments, media technology, workshops or production areas. Thanks to the moulded plug connection, the cable is particularly robust and resistant to frequent plugging and unplugging – an important feature for daily use under

demanding conditions. The compact design is specially designed for applications where space is limited or devices are installed close together. The technical design ensures that all European safety standards are met. As a supplementary item in the stock of system houses or technical wholesalers, the Euro extension cable is ideal for supplying a wide variety of devices, such as external hard drives, AV components, chargers or other electronic peripherals without a protective contact. Rely on tested quality for professional applications – with the InLine® Euro extension cable, you are on the safe side.

Plug type: Euro plug (CEE 7/16) to Euro socket
Number of poles:2-pole
Maximum load:2.5 A / 250 V
Plug type: Moulded design
Area of application: For devices in protection class II
