often a lack of classic USB-A ports. This hub provides an uncomplicated remedy and provides a total of four USB-A ports - one of which is a USB 3.2 Gen.1 port for high data rates of up to 5 Gb/s. Whether for rollouts, flexible workstation concepts or IT support: With the InLine hub, you can connect peripherals such as mice, keyboards, USB sticks or diagnostic tools directly and without additional driver installation. Each port supports hot swap and plug & play, enabling flexible use even during operation.

Thanks to its slim design, the hub is not only suitable for stationary use, but also ideal for travelling - e.g. in service bags or as a daily companion for technicians and system administrators. The broad compatibility with Windows and macOS systems makes it a versatile helper in the professional environment.

Ports: 3x USB 2.0 A socket, 1x USB 3.2 Gen.1 A socket
