

Anycubic Resin Tank for the Photon Mono M7 Pro

Model: S020233

Manufacturer: ANYCUBIC

EAN: 5905156103955

Product Code: 1082344

R2,791

Anycubic Resin Tank for the Photon Mono M7 Pro

The Anycubic Resin Tank for the Photon Mono M7 Pro is designed for use with a large build volume and high-precision printing, featuring an integrated Smart Heating Resin system that stabilizes the temperature of the resin and improves layer-by-layer polymerization performance. The factory-installed ACF film features a lower adhesion coefficient and better peel strength compared to standard FEP films, resulting in less stress on the Z-axis and a smoother layer separation process. The tank's dimensions, tailored to the device's build platform, ensure even resin distribution and compatibility with rapid printing systems, which in turn translates to process stability and print repeatability.
