

Neomounts FL55-975BL1 TV trolley 75-115" - motorised

Model: FL55-975BL1

Manufacturer: NEOMOUNTS

EAN: 8717371449889

Product Code: 1083627

R20,948

The Neomounts FL55-975BL1 MOVE Lift XL is the ideal motorised trolley for large displays up to 115" and 160 kg. The heavy-duty stand offers 65 cm of motorised height adjustment, allowing both seated and standing presentations at the perfect viewing height and raising the screen above the audience. Operation is smooth and precise via a conveniently positioned control panel. The anti-collision system ensures safe height adjustments, and the brackets can be locked with a padlock (not included) for extra security. A ventilated, lockable hardware compartment with a cable opening can be optionally installed to provide clean and secure equipment storage.

Designed for maximum mobility, the MOVE Lift XL features a large handlebar and heavy-duty 100 mm double-locking castor wheels for easy movement across any surface, including thresholds and carpet. The open wheelbase design allows easy access to (touch) displays and improves maneuverability around obstacles. A cable duct is included to route and conceal cables neatly from the floor stand to the screen. The MOVE Lift XL comes partially pre-assembled for quick, effortless installation.
