Blitzwolf BW-S28 260W, 2xUSB-A, 3xUSB-C, 15W wireless charger (black)

The BlitzWolf BW-S28 network charger is an advanced solution for charging multiple devices simultaneously. With a maximum output power of 260 watts and five ports (2xUSB-A, 3xUSB-C), it allows you to efficiently power up to five devices at once. The product is also distinguished by wide compatibility and a digital display that provides access to information on current parameters. It also allows wireless charging, which further enhances its functionality.

GaN technology for faster and more efficient charging

The BlitzWolf BW-S28 uses GaN (gallium nitride) technology for greater energy efficiency and better heat dissipation. As a result, the charger not only charges your devices quickly, but also maintains a low temperature during operation, prolonging its life and making it safer to use. The solution used also made it possible to reduce the size of the product.

High output power and support for fast charging

The charger's USB-C1 port offers a maximum output power of 140 watts, which means you can easily charge even the most demanding devices, including laptops and tablets. What's more, the product supports various fast charging standards, such as PD3.1, QC4+, PD3.0, QC3.0, QC2.0, PPS and SCP, for example. This way you don't have to wait too long until your devices are ready to work again!

Simultaneous charging of five devices

With five available ports, the charger allows you to charge five devices simultaneously, making it ideal for families, offices and more. Forget about having to wait until one device is charged before plugging in another! An additional advantage of the BW-S28 is its wide compatibility. With its help you can easily charge most popular models of laptops, smartphones, tablets, headphones, portable game consoles and much more.

Digital display and easy operation

The BlitzWolf BW-S28 charger is equipped with an intuitive digital display that shows the current voltage and amperage for each port, giving you full control over the charging process. What's more, a touch-sensitive button allows you to turn the display on and off, which is convenient especially during nighttime use.

Wireless charging

The BW-S28 also supports wireless charging with up to 15 watts of power, so you can conveniently charge compatible smartphones. In addition, the non-slip silicone on the surface of the device ensures the stability of your phone while charging, preventing it from sliding or falling.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice.
