Network Interface Card providing web access, data via SNMP, Modbus, BACNet and Vertiv Cloud service connectivity for Vertiv equipment | Environmental sensor data access is provided via web and SNMP.

The Vertiv Liebert IntelliSlot RDU120 Network Card (RDU120) enables communication among Vertiv products such as Vertiv Environet Alert, Vertiv Power Insight, Vertiv Power Assist and LIFE Services. It provides web access, data via SNMP, Modbus and BACNet for Vertiv equipment. Using this card allows you to have real-time view of parametric data and system status. It supports environmental monitoring via Geist Sensors for temperature, humidity, leak detection, door closures and contact closures. Environmental sensor data access is provided via web and SNMP. This network card is UL2900-1 cybersecurity certified. It keeps data secure through HTTPS web connectivity, SNMP v3 and remote authentication protocols. This card employs Ethernet network to monitor and manage a wide range of operating parameters, alarms and notifications, which can also be sent promptly via email.
