Play your way

Say hello to HyperX’s most customizable gaming mouse: the Pulsefire Saga Pro. This mouse uses ergonomically designed interchangeable components to adapt to different grip styles with up to 16 comfortable combinations. Simply swap out the magnetically mounted components to find your perfect fit completely tool-free. Whatever configuration you choose, this mouse weighs in at only 72 grams, so you will never have to sacrifice agility for comfort. This mouse is equipped with pro-grade 4k wireless polling so you can game with confidence knowing every click is captured. Long gaming sessions? No problem! With Pulsefire Saga Pro you can game for up to 90 hours[1] on a single charge in 1kHz polling mode. The upgrades don’t stop there. Pulsefire Saga Pro is also equipped with HyperX Optical Switches that balance laser-accurate actuation with a tactile click. Unlike traditional switches that require a mechanical contact, optical switches utilize a light-triggered mechanism that translates clicks to immediate actions. No debounce, no delays. Pulsefire Saga Pro also offers dual

wireless connectivity, utilizing a high-speed 2.4GHz wireless dongle or Bluetooth with compatible devices. Or ditch the dongle with Instant Pair, connecting to enabled OMEN gaming laptops without any additional components. The customization goes beyond the surface level. Connect to HyperX NGENUITY software to set motion tracking up to 26k DPI, remap buttons, adjust polling rate, set custom RGB effects, and monitor battery life.
