Hear every layer come alive with extended bit depth and high sampling rates. Samsung Seamless Codec (SSC) supports 24-bit / 96 kHz audio to preserve the original sound with vast amount of information, while optimised data transmission control enables a stable listening experience with reduced audible artefacts or dropouts. Turn on the Ultra High Quality Audio (UHQ) option on your Galaxy smartphone and rediscover your favourite songs in full detail.

Rich sound adjusted your way

Take a step closer to stable, everyday audio. Customise bass, treble and tone with the 9-Band Equaliser to match your preference, creating a sound signature tailored just for you. Galaxy Buds4 also optimises sound adaptively to your ear shape and wearing style, ensuring a consistent listening experience as your ears perceive it — even when you adjust the volume.

Super Clear Call, even in noise

Your voice is clearly captured by 6 microphones positioned around your head, intelligently isolating it from the background sound with advanced Deep Neural Network (DNN). The exceptionally clean voice signal is transmitted with pure effortlessness through Super Wideband (SWB) up to 16 kHz between your Galaxy Buds4 and Galaxy smartphone. Hear and be heard, loud and clear — even in noisy moments.

Surround yourself in sound

Expand your soundstage from stereo into a grand orchestral hall or a large arena, placing you at the centre of a live performance with a single touch. Feel instruments and vocals in three dimensions, and experience the atmosphere enveloping you in music.

Dive into your personal soundscape

With its quality sound system, Galaxy Buds4 achieves precise noise control. Distractions fade in real-time as the Active Noise Cancelling (ANC) algorithm instantly processes and adapts to your ear shape and fit. Tune in to immersive sound wherever you are.

Listen to music while staying connected

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. Manage your listening experience your way. Galaxy Buds4 adjusts the levels of ANC and ambient sounds in real-time, adapting to your environment — whether youre sensitive to noise or prefer more blending. Stay more immersed in the music while remaining connected to the world around you.

Simple connection. Straight to the tunes

Just open the Charging Case and youre all set — as simple as that. No apps, no downloads and of course, no hassle. Your Galaxy smartphone and Galaxy Tab detect Galaxy Buds4 for easy pairing.

Now one in One UI

The evolved One UI 8.5 creates a deep connection between your Galaxy Buds and Galaxy smartphone, almost like a duet. Control has never been more intuitive — manage features from the device settings, without downloading a separate app. From the Quick Panel, you can easily access features and also set and save sound preferences for each app.

Personal AI translator in your ear

Break language barriers with a personal AI translator in your ear. Fully engage in the moment with Galaxy AI powered interpreter — hear it through Galaxy Buds4 and read it on your Galaxy smartphone. Galaxy AI steps in to ensure clear communication across different languages.

Your AI, hands-free

Ask for assistance with just your voice — no phone-pulling required. Simply speak to AI agents such as Bixby to get answers to questions or manage tasks instantly without slowing you down.

Just nod and shake

Intuitive nods and shakes let you respond quickly, from answering calls to talking to Bixby, without lifting a hand. Get what you need effortlessly, even in situations where your hands are busy or when its not an ideal time to speak.

Switch instantly between Galaxy devices

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

Auto Switch shifts your audio to the most pressing task at hand. Take a call on your Galaxy smartphone while focusing on your creative project on your Galaxy Tab or Galaxy Book. Jump right back to where you left off, the instant you hang up. The experience is seamless across your Galaxy devices.

Designed for ease, crafted for beauty

Check that Galaxy Buds4 is properly in place through the translucent cover. Charge wirelessly and simply take it anywhere — its compact, lightweight design makes it easy to carry.

Let your music stay in place effortlessly

Backed by global ear data, Galaxy Buds4 is shaped with a computational design that enhances wearability. Galaxy Buds4 stay snugly in your ears, whether you're indoors or outdoors.

Easy pinch, easy controls

Now with the upgraded Pinch Control, you can manage your media or control the volume with just your index finger — no need to reach for your phone.
