AOCHUAN M3 Pro Gimbal with RGB Lighting (White)

The Smart M3 Pro Gimbal is a modern, multifunctional tool designed for anyone who wants to record stable and impressive footage effortlessly. It combines the functions of a selfie stick, image stabilizer, AI-powered smart gimbal, and tripod into one compact device. Thanks to built-in face tracking, gesture control, an RGB module, and a remote control, you can create professional recordings without installing any apps. It's a device that works right out of the box—intuitively and effectively.

Record without an app—a device that works right out of the box

Forget complicated setup. The Smart M3 Pro uses built-in AI for automatic face and motion tracking—no app installation required. Just turn on the device, position your phone, and... you're

ready to go. Plus, you can control recording with gestures, giving you complete freedom of movement—the perfect solution for vloggers, creators, and solo shooters.

Stability that makes a difference

Thanks to the built-in motor and anti-shake technology, every shot is smooth and stable. Even while moving or walking, the image remains clear and professional. Mechanical 360° rotation allows for complete freedom of framing, giving you unlimited possibilities for creative shots.

Perfect lighting in any conditions

Built-in, adjustable RGB lighting with 7 colors lets you match the mood of your recording to the situation. Whether you're recording at home, outdoors, or after dark—you'll always look professional. This is a huge advantage over standard mounts.

Full remote control - unlimited convenience

The included Bluetooth remote lets you control recording from up to 10 meters away. You can freely frame your shot and start recording without having to run to your phone. What's more, the remote's battery lasts up to 30 days, so you can forget about constantly recharging it.

Lightweight, portable, and ready to go

It weighs just 530 g, so you can easily take it anywhere—to work, on a trip, or for a walk. Its compact design means it fits in a bag or backpack, yet it's sturdy enough to hold smartphones weighing up to 300 g.

Long battery life - create without interruptions

The built-in 1000 mAh battery provides up to 7 hours of runtime in manual mode and up to 4 hours with AI tracking enabled. Charging takes about 3 hours, so you'll be back in action quickly. It's the perfect solution for people who record a lot and don't want to worry about power.

Professional capabilities in your hands
