OTTOCAST OTTOAIBOX N95 Car Monitor

The OTTOCAST OTTOAIBOX N95 car monitor is a portable multimedia hub featuring a large 11.4-inch touchscreen that brings wireless Apple CarPlay and Android Auto to virtually any vehicle with a 12V+ power source. Thanks to the Android 13 system, the device offers extensive app installation and customization options, which translates to convenience in everyday use. A fast boot time of about 2 seconds and automatic reconnection mean the device is ready to go almost immediately after turning on the ignition, without unnecessary waiting.

Large screen and user-friendly operation

The 11.4-inch display provides a clear and legible image, which is important when using navigation or multimedia apps while driving. Thanks to smooth 60 FPS performance, touch response is fast and predictable, making it easier to control functions without distracting the driver. A larger screen also means better visibility of details, making it simply more convenient to use maps or playlists.

Wireless CarPlay and Android Auto

The device allows for a wireless connection to your smartphone, eliminating the need to plug in cables every time. This makes accessing navigation, music, or contacts faster and more intuitive, especially during short trips. The automatic reconnection feature ensures that the system restores the last connection as soon as you get into the car, saving time and simplifying operation.

Versatile audio options

The monitor offers several audio transmission methods, allowing you to adapt it to various in-car audio systems. Bluetooth support enables wireless playback, while AUX and FM transmitter work well in older car models. The built-in speaker provides an additional solution, allowing you to use the device even when you don't want to connect it to the car's system.

Quick installation and portability

The plug-and-play design means that installing the device requires no modifications to the dashboard or specialized tools. As a result, installation takes only a few minutes and poses no risk of damaging the car's factory components. The monitor's portable nature also allows you to easily move it between different vehicles, increasing its versatility.

Android system and additional features

The use of Android 13 provides access to many apps, expanding the device's functionality beyond standard navigation and music. The ability to customize the interface allows you to adjust the screen's appearance and layout to your preferences, improving user comfort. Support for memory cards up to 256 GB enables multimedia storage, and the day/night mode automatically adjusts screen brightness, making the device comfortable to use at any time.

Included

- OTTOCAST OTTOAIBOX N95 Monitor
- Mounting bracket with base
- Power cable with car charger
