OTTOCAST OTTOSCREEN N95C car monitor

The OTTOCAST OTTOSCREEN N95C car monitor is a quick way to transform your car into a modern multimedia center without altering the vehicle's wiring. The device features a large 11.4-inch HD screen, Android 15, wireless Apple CarPlay and Android Auto, and a smooth interface running at 60 FPS. Built-in support for Google Gemini and "Hey Google" commands enables convenient voice control and quick access to information. The entire system runs on a powerful 8-core processor and expanded memory, allowing you to use multiple apps simultaneously. Installation is as simple as plugging it into the cigarette lighter socket, so the device is ready to use in just a few minutes.

Smooth display and large 11.4” screen

The 11.4-inch widescreen display provides a clear and detailed image when using navigation and multimedia. Support for a 60 FPS refresh rate makes the interface run noticeably smoother than in standard solutions of this type. This is especially important when scrolling through maps, switching between apps, or using CarPlay. The larger workspace also makes it easier to use split-screen mode.

Android 15 and full app freedom

The Android 15 operating system allows you to install apps without restrictions, offering greater flexibility than closed factory-installed systems. You can use navigation, YouTube, Netflix, or Spotify directly on the device’s screen. As a result, the display functions as a standalone in-car tablet, rather than just an extension of your phone. In practice, this means more options for customizing features to suit your needs.

Wireless CarPlay and Android Auto

The device supports wireless Apple CarPlay and Android Auto, so you don’t have to connect your phone every time. After the initial pairing, the connection is established automatically, which reduces the system’s startup time. This solution also eliminates the problem of cables cluttering the dashboard. This is especially convenient for everyday use.

Performance and multitasking

The 8-core processor, combined with 4 GB of RAM and 32 GB of ROM, ensures stable system performance even with multiple apps running. The split-screen feature allows you to use navigation and multimedia simultaneously. This lets passengers view content while the driver continues to see the route. This setup results in a more comfortable experience on the road. Installation is simple and involves plugging the device into the car’s cigarette lighter socket, eliminating the need to modify the car’s wiring. The car power adapter can simultaneously power the device and provide additional ports for connecting accessories (e.g., charging a phone). The entire system is ready to use within minutes of being plugged in. It’s a practical solution for people who don’t want to replace their factory-installed radio.

Google Gemini and voice control

The device uses Google Gemini technology, which enables the use of an advanced voice assistant. The “Hey Google” command lets you quickly launch navigation, check the weather, or search for information. This means you can operate the device without taking your hands off the steering wheel. This solution enhances convenience and helps reduce distractions while driving. To use apps such as Netflix or YouTube, the device requires an internet connection. This is most commonly achieved via a phone hotspot, which allows you to quickly share your internet connection without additional accessories. This gives you access to all online features anywhere.

Rearview camera version

This version of the kit has been expanded to include a rearview camera, which enhances the device’s functionality by providing assistance during parking. The camera feed can be displayed directly on the monitor screen, making it easier to maneuver and improving visibility behind the vehicle. This solution is particularly useful in larger cars or in tight spaces. Thanks to its integration with the screen, there’s no need to install additional displays, which simplifies the entire system.

Included in the set

- OTTOCAST N95C monitor
- Mounting bracket
- USB cable with car charger
- AUX cable
- Rearview camera
- User manual

Manufacturer	OTTOCAST
Model	N95C (with rearview camera)
