Add four 5Gbps USB-A ports (one with BC 1.2) to your laptop or PC using a single USB-C or USB-A connection

This 4-port SuperSpeed USB hub lets you instantly add four USB-A 3.0 ports, including one BC 1.2 charging port, from a single USB connection-ideal for connecting keyboards, mice, flash drives, and external storage devices at the same time.

## Fast Charge, Even Without a Host

The dedicated BC 1.2 fast-charge port delivers up to 1.5A (7.5W) and supports CDP for data and charging or DCP for charging when the hub isn't connected to a computer. A 24W total power budget is shared across all ports for reliable device charging.

## Reliable, Self-Powered Operation

Powered by the included 24W external adapter, the self-powered hub ensures stable performance even with multiple devices connected. Built-in overcurrent and overvoltage protection helps reduce device dropouts and protects the host system, while support for Wake on USB and USB event monitoring enhances manageability.

## Easy Integration

A removable 2-in-1 USB-C/USB-A host cable provides flexible connectivity with modern and legacy systems.

## Sustainable Design

The hub features a 70% post-consumer recycled (PCR) plastic enclosure and a 35% PCR TPE jacket, helping reduce environmental impact and support ESG requirements.
