R3,420

NEEWER TL60 20W LED Tube Light

The NEEWER TL60 is a professional RGB LED tube light designed for video content creators, photographers, and filmmakers. Featuring a tubular design, this device offers extensive mood-setting capabilities thanks to RGB technology, which allows for precise control over light color. It is a versatile tool suitable for use in studios, on film sets, and for field work.

Lighting Characteristics

The NEEWER TL60 enables the generation of a wide color palette, which is essential for creative control of the visual atmosphere. RGB technology allows you to choose from millions of shades, enabling precise adjustment of the light to the scene's requirements. You can customize the light color to suit the needs of a given production, which will significantly expand your artistic possibilities. Thanks to the use of LEDs, this product delivers stable and repeatable lighting results, supporting the creative process at every stage.

Flexibility in Use

Its tubular design makes the NEEWER TL60 an extremely flexible lighting tool that can be easily integrated into various setups. Its long, slender shape allows the lamp to be placed in tight spaces or used to create creative lines of light. The ability to hold the lamp in your hand opens the door to dynamic lighting effects and light painting. This versatility makes it the perfect choice for both studio and on-location work.

Design and Ergonomics

The NEEWER TL60 lamp is designed with ease of use and durability in mind, which is essential in a demanding production environment. The ergonomic design ensures comfortable operation, whether the unit is mounted on a tripod or used handheld. Carefully selected construction materials guarantee durability for daily use and transport. The entire unit is designed for professional use, offering the reliability that creators expect.

Creative Potential

With advanced color and light intensity control capabilities, the NEEWER TL60 opens up new possibilities for visual creativity. You can experiment with various color schemes to create unique moods and special effects. RGB technology allows for smooth color transitions and dynamic light sequences that enhance any production. It is a tool that supports artistic vision, enabling the realization of even the most ambitious ideas.

Power Supply and Compatibility

The NEEWER TL60 is designed for use in the European Union, meaning it meets local power standards. The device is engineered to provide a stable and efficient light source under various conditions. Compatibility with European standards facilitates integration with existing equipment and eliminates the need for additional power adapters. This solution guarantees trouble-free operation in European studios and on film sets, ensuring convenience and safety of use.
