R33,961

Stay agile and flexible with the RF 70-200mm F4L IS USM and always get the shot. With its useful 70-200 mm focal length it is a supremely versatile lens for all manner of subjects, from portraits to wildlife. And with a constant f/4 aperture throughout the zoom range, it gives stunning bokeh at its widest aperture, perfect for separating your subject from either foreground or background. L-series image quality delivers superb edge-to-edge sharpness while a 5-stop optical Image Stabilizer ensures camera shake is greatly reduced for handheld shooting. In rain, sun or shine, this compact telephoto zoom will deliver superb results – and it won't take up much space in your camera bag either.
