

Minix C1 Wireless USB-C to HDMI Video Transmitter

Model: NEO-C1

Manufacturer: MINIX

EAN: 4897016411267

Product Code: 1088717

R2,115

Minix C1 Wireless Video Transmitter (USB-C to HDMI)

The Minix C1 is a video transmitter that allows you to wirelessly stream content from USB-C devices to a screen with an HDMI input—quickly, conveniently, and without any complicated setup. Simply connect the transmitter to your laptop, smartphone, or tablet, and the receiver to your monitor or TV, to get started immediately thanks to the Plug & Play feature. The device requires no app installation or login, and the transmission range reaches up to 50 meters, providing great flexibility for use in various spaces.

No cables and no setup - instant operation

Thanks to Plug & Play technology, using the transmitter is extremely simple and fast. You don't need to install additional software or create accounts—just connect both modules and start streaming the

image right away. It's the perfect solution for the office, school, or home.

Mirror and Extend modes - tailor the display to your needs

The device supports two operating modes: Mirror and Extend. You can display an identical image on a larger screen or extend your desktop to gain additional workspace. This is particularly useful during presentations, office work, or multimedia viewing, where configuration flexibility is crucial.

Stable transmission up to 50 meters

With the Minix C1, you can wirelessly transmit the image up to 50 meters. The stable connection ensures smooth video playback and a comfortable user experience without the need for long cables.

Wide compatibility and DisplayPort Alt Mode support

The transmitter works with devices equipped with a USB-C port supporting DisplayPort Alt Mode, allowing you to connect laptops, smartphones, or tablets. Support for the iPhone 15 further expands compatibility, enabling convenient image transmission from Apple mobile devices as well.

Versatile use - work, entertainment, and travel

The Minix C1 is ideal for a wide range of scenarios—from presentations and video conferences, through office work and learning, to gaming and home theater. Its compact design makes it easy to transport, so you can use the device on the go, quickly setting up a mobile workstation or entertainment setup.
