

Hcalory D55M+ Car Cooler with Bluetooth

Model: D55M+ with bluetooth

Manufacturer: HCALORY

EAN: 5905156102972

Product Code: 1089456

R6,439

Hcalory D55M+ Car Cooler with Bluetooth

Travel becomes much more comfortable when reliable equipment ensures food stays fresh and drinks remain at the right temperature. The Hcalory D55M+ combines large capacity, efficient compressor cooling, and a functional design, making it ideal for use in cars, RVs, as well as during camping trips or fishing excursions. A well-thought-out dual-zone system allows for flexible storage of items, while Bluetooth and mobile app control provide even greater ease of use. Also noteworthy are two operating modes, various power options, and features that facilitate transport and use of the unit in the field. This model is designed for people who don't want to compromise on comfort even when away from home.

Two zones, more possibilities

The high-quality compressor system used in the Hcalory D55M+ operates within a temperature range of -20°C to 20°C , allowing you to effectively cool and freeze food depending on your current

needs. A major advantage of the unit is its Dual Zone design, which allows the refrigerator to function as both a refrigerator and a freezer simultaneously. This solution offers great flexibility when planning trips, as it allows for the convenient storage of beverages, vegetables, meat, and other ingredients under the appropriate conditions. By removing the divider, the space can be adapted for other uses, allowing the unit to function as a single, larger refrigerator or freezer.

Fast cooling and energy-efficient operation

The Hcalory D55M+ offers two operating modes, making it easy to adapt its performance to the current situation. In Max mode, the unit can cool the interior to 0°C in just 15 minutes, which is particularly useful right before departure or after restocking. ECO mode, on the other hand, is designed for more economical and environmentally friendly operation, with daily energy consumption in this case being less than 0.18 kWh. An additional advantage is the three-stage car battery protection with low, medium, and high levels, which helps protect your vehicle's battery cells from over-discharge.

Ready for the road, camping, and overnight stays in the great outdoors

The D55M+ model was designed for outdoor use, making it ideal for camping, outdoor expeditions, and other outdoor activities. The anti-shock construction increases the unit's resistance to shocks, which is particularly important when traveling on rough terrain. The 45-liter capacity provides plenty of space for items needed during longer trips, and the refrigerator itself won't disturb your rest—its operating noise level is just 45 dB. This creates a pleasant environment both during travel and when spending the night in a car or camper.

Flexible power supply in various conditions

Another advantage of this refrigerator is its ability to use various power sources. The 100–240 V AC interface allows it to be used at home, while the 12/24 V DC connector ensures it can be easily powered by a car or RV electrical system. But that's not all, because during trips, the unit can also work with solar panels and energy storage systems, further expanding its range of applications. As a result, the Hcalory D55M+ easily adapts to various usage scenarios—from daily travel preparations to extended stays away from a permanent power source.

Thoughtful details and convenient controls

User comfort is also enhanced by numerous practical solutions that you'll particularly appreciate when away from home. The Bluetooth feature allows you to control the refrigerator via a mobile app, enabling you to conveniently manage its operation without having to walk over to the unit each time. Built-in LED lighting makes it easier to use the interior of the cooler after dark or in low light, while non-slip handles and wheels help you efficiently transport it wherever it's needed. The set also includes accessories such as a cutting board and a drink holder, making everyday use of the device even more practical.

Included

- Hcalory car refrigerator
- DC power cord
- Cutting board
- Beverage holder
- User manual

Manufacturer	Hcalory
Model	D55M+
Material	ABS+PP
Car use	Universal DC 12/24 V power supply
Home use	Wide AC voltage range 220-240 V
Power consumption	50 W
Lid	Single
Capacity	55 L
Temperature range	With divider removed: -20°C to 20°C for the entire space / With divider inserted: left side -20°C to 20°C, right side constant, 10°C to 20°C higher than the left side
Battery protection	3-stage voltage protection
