PGYTECH DJI Air 3/3S Storage Case

The PGYTECH Safety Carrying Case is a sturdy and reliable solution for storing and transporting your DJI Air 3 or 3S drone and its accessories. It is designed to protect your equipment in harsh conditions, keeping you safe while traveling, regardless of the weather or terrain. The rugged case protects the contents from water, dust, shock and corrosion, keeping your drone and accessories in perfect condition.

Thoughtful interior organization

The interior of the case was designed to accommodate all the necessary kit items. Special compartments allow you to safely store your DJI Air 3 or 3S drone with battery installed, five additional smart batteries, DJI RC 2, RC-N2 or RC-N3 controller, charging hub, power cord, lens filters, spare propellers and other small accessories. The entire case is padded with EVA foam to absorb shock and protect equipment from mechanical damage.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. Resistance to harsh conditions

The case is fully waterproof (IP67), allowing you to transport your drone even on rainy days. The corrosion and mechanical damage resistant material ensures durability in all conditions. In addition, the case is designed to withstand extreme temperatures, so you can travel with it to different corners of the world without worry.

Pressure equalization valve

The built-in pressure equalization valve prevents the suitcase from being "sucked in" during changes in altitude, such as during an airplane flight. As a result, the suitcase remains easy to open regardless of external conditions.

Safety and convenience of use

The PGYTECH suitcase is equipped with padlock slots to further secure the contents from unauthorized access. The ergonomic handle makes it easy to carry, and the compact size means that the suitcase will fit in the trunk of a car or as hand luggage. It's ideal for people who travel frequently with their drone and want to make sure their equipment is well protected.
