Uni-T UT387S Wall Scanner

The Uni-T UT387S wall scanner is a practical tool for detecting hidden objects in walls, combining several functions in a single device—it locates ferrous metals up to 100 mm, non-ferrous metals up to 80 mm, wood up to 38 mm, and AC electrical wires up to 40 mm, and additionally offers wood moisture measurement (6–40%) and a laser rangefinder function with a range of up to 40 m. Equipped with a clear, 2.4-inch color screen, voice prompts, and a Li-ion battery, it ensures ease of use during both renovations and DIY projects. Various measurement modes allow you to tailor the device's operation to a specific task, which translates to greater precision and safety.

Precise detection of various materials

The device can locate the most common structural and plumbing elements. This helps prevent accidental damage to wires or pipes while drilling, which directly improves safety and reduces repair costs. Various operating modes allow you to better adjust the sensitivity to the material, increasing

detection effectiveness.

Additional features for everyday use

The built-in laser rangefinder enables quick distance measurements without the need for additional tools, and the wood moisture measurement function is useful, for example, in carpentry work or when assessing the condition of materials. The color screen makes it easy to read results, and voice prompts assist the user during operation, resulting in greater comfort and intuitive handling.

Included in the set

- Uni-T UT387S wall scanner
- USB cable
- User manual
- Original cardboard packaging
- Fabric carrying case

Manufacturer	Uni-T
Model	UT387S
Ferrous metal detection	up to 100 mm
Non-ferrous metal detection	up to 80 mm
Wood detection	up to 38 mm
AC wire detection	up to 40 mm
Wood moisture measurement	6%–40%
Laser rangefinder	up to 40 m
Display	2.4" color
Power supply	Li-ion battery
Additional features	voice prompts, auto-off, multiple measurement modes
Certifications	CE, UKCA
Color	red and gray
