R1,837

Uni-T A25D PM2.5 Monitors

The A25 Series PM2.5 is a compact air quality monitor designed for everyday use in a variety of settings—from homes to offices and commercial spaces. The device focuses on measuring PM2.5 concentrations, allowing you to quickly assess air quality and take action when it deteriorates. Built-in features, such as audible and visual alarms and automatic baseline calibration, make the meter easy to use and require no specialized knowledge. Additional features, such as screen backlighting and automatic shut-off, enhance user convenience and save energy.

Included

- A25 Air Quality Monitor
- Micro USB cable
- User manual
