JMGO PicoPlay+ Projector

The JMGO PicoPlay+ is a projector that redefines mobile entertainment. Compact, lightweight, and extremely powerful, it combines LED technology with Full HD image quality, offering complete freedom of use at home, in the office, or outdoors in the garden. This device is designed for people who refuse to compromise between quality and portability. Whether you're planning a movie night in the living room, a presentation at work, or a spontaneous screening on the go, the PicoPlay+ adapts to your lifestyle.

High-quality image

The display features 1080p Full HD resolution supported by HDR10, resulting in a clear, detailed, and dynamic image. With 450 ISO lumens of brightness and a 400:1 contrast ratio, you can enjoy the projection in various lighting conditions. The projector displays images ranging from 40 to 200 inches, allowing you to easily turn any space into a private home theater. Additionally, 90% coverage of the DCI-P3 color gamut guarantees realistic colors and depth, which will be especially

appreciated by fans of movies, TV shows, and games.

Smart TV - all in one device

The built-in Google TV 3.0 system provides instant access to the most popular streaming platforms, such as Netflix, Prime Video, and YouTube – without the need to connect additional devices. Thanks to native Netflix support, everything runs smoothly and without restrictions. The built-in Chromecast allows for quick content streaming from your smartphone or laptop, and Google Assistant lets you control the projector with your voice, significantly enhancing the comfort of everyday use.

Full projection flexibility

The JMGO PicoPlay+ was designed with maximum convenience in mind. The adjustable projection angle of up to 127° vertically allows you to precisely adjust the setup to indoor or outdoor conditions without needing additional pads or stands. The additional ability to display the image in portrait orientation opens up new usage scenarios—from social media to presentations. Operation is made easy by the touch control panel located on top of the device, allowing you to quickly change settings even without a remote control.

Sound that fills the space

The built-in 8W speaker, supported by Dolby Audio technology, delivers clear, crisp, and immersive sound. This solution eliminates the need for additional speakers, preserving the device's portable nature. Whether you're watching a movie, playing a game, or listening to music, the PicoPlay+ delivers a consistent and immersive audiovisual experience.

More than just a projector

The built-in optical filter generates an effect reminiscent of the Northern Lights, which creates a unique ambiance in ambient mode. The ability to customize the lighting (adjusting saturation, brightness, modes, and dynamic effects) means that the PicoPlay+ can also serve as a decorative light source. It's the perfect solution for relaxing, working, or setting the mood during evening movie sessions.

Ready to travel

USB-C power gives you complete freedom. The projector can be connected to a power bank, making it an excellent travel companion. Additionally, impressive mobility goes hand in hand with performance—the device features a 20,000 mAh battery with Power Delivery 3.0 support and up to 65 W of power, yet weighs just 0.72 kg. What’s more, you can equip yourself with a floor or ceiling mount (sold separately) to enjoy an even better cinema experience in your home.

Unlimited Connectivity

The JMGO PicoPlay+ offers extensive connectivity options thanks to its HDMI 2.1 ports with ARC, USB 2.0, and USB-C. Support for Wi-Fi 5 and Bluetooth 5.1 enables a fast, stable, and wireless connection to your laptop, game console, smartphone, or headphones. No matter how you enjoy your media, the projector will seamlessly integrate into your device ecosystem.
