

JMGO Ceiling Mount for N1S SE, Nano, and PicoPlay+

Model: P032

Manufacturer: JMGO

EAN: 6959422616112

Product Code: 1090339

R2,462

JMGO Ceiling Mount for N1S SE, Nano, and PicoPlay+

The JMGO ceiling mount is a meticulously designed solution created for the convenient and aesthetically pleasing installation of projectors. It combines a lightweight yet extremely stable construction made of aerospace-grade aluminum, a well-thought-out cable management system, and an elegant design in starlight gray. It offers two height options, making it easy to adapt to your specific space and room layout. Compatibility with JMGO projectors and other devices with a 1/4" thread (up to 10 kg) makes it a versatile solution for home theaters and beyond. It's a combination of functionality, aesthetics, and durability that enhances the comfort of everyday use.

Stability you can rely on

The construction made of aerospace-grade aluminum guarantees lightness, but above all, exceptional durability and safe installation. The mount is designed to ensure maximum stability even during prolonged use, eliminating the risk of vibrations or looseness. This solution works equally well in a home living room and in more demanding spaces where the reliability of every installation component is critical.

Installation flexibility tailored to your space

With two rod height options (100 mm and 300 mm), you can precisely adjust the mount to the ceiling height and the optimal projector position. This solution allows you to achieve the perfect projection angle and full design flexibility. Note: the rods should not be connected to each other. An integrated U-shaped cable channel makes it easy to organize cables and hide them inside the structure. This ensures a neat and professional installation, free of visible, tangled cables.

Designed with modern projectors in mind

The mount was created specifically for JMGO projectors, including the N1S SE, Nano, and PicoPlay+ models, but its versatility extends far beyond that. Thanks to its standard 1/4" thread, it is also compatible with other devices weighing up to 10 kg, making it a versatile solution for various applications—from home theaters to presentation spaces.

Quick and hassle-free installation

The kit includes all the components necessary for installation, allowing you to set it up efficiently and without any issues. The set includes a base, cover strips, rods, screws, a head, a positioning sticker, and a user manual, making the entire process intuitive even for those with no experience. This solution allows you to quickly prepare the space for projection and immediately enjoy the final result.

Included

- mount
- positioning sticker
- expansion bolts
- self-tapping Phillips screws
