NEEWER TL98C DMX LED Light Stick

Compact, lightweight, and versatile—the NEEWER TL98C DMX LED Light Stick is designed for creators who want full control over lighting without having to carry heavy equipment. Its compact design houses powerful RGB LEDs and extensive operating modes, allowing you to easily create atmospheric shots for photography, videos, live streams, or content for TikTok and YouTube. App control, the ability to manage groups of lights, special effects, and magnetic mounting make this handy LED light stick suitable for almost any situation.

Compact size, huge possibilities

The light measures just 108 × 40 × 44 mm and weighs 134 g, so it easily fits in a bag, backpack, or even a pocket. Despite its compact size, it offers impressive lighting capabilities thanks to a set of 36 cool white LEDs, 33 warm white LEDs, and 24 RGB LEDs. With 4.5 W of power and a brightness of up to 360 lux at a distance of 0.5 m, it effectively illuminates the scene, while a CRI of 97 ensures

natural color reproduction. The light can operate independently or in combination with multiple units, opening the door to even more impressive lighting setups.

Professional control via the app

The NEEWER app allows you to remotely control the light from a distance of up to 15 meters. From the app, you can conveniently adjust brightness, color temperature, and color saturation, as well as select preset lighting effects. The manufacturer has also included more professional features related to DMX control. You can create your own lighting programs, save settings, and control multiple lights simultaneously. The system supports up to 8 groups, and each group can include up to 128 devices, which significantly simplifies the organization of more complex photo shoots and stage lighting setups.

Extensive operating modes and special effects

The lamp offers three main operating modes that allow you to precisely adjust the light to the nature of the scene. In CCT mode, you can adjust the color temperature within a range of 2500K to 10000K. The built-in GM control allows you to further calibrate the light color and match it even more precisely to other lighting sources. HSI mode provides complete creative freedom thanks to 360° color adjustment, brightness control from 0 to 100%, and color saturation settings. Users also have access to 17 scene effects, such as lightning, fireworks, and police car lights, which allow you to instantly set the mood without the need for additional accessories. Operation is made easy by a clear OLED screen and physical buttons located directly on the housing. The lamp also supports OTA updates via the app, allowing its capabilities to be expanded with future software versions.

Long runtime and convenient charging

The built-in 3.7V lithium battery with a capacity of 2600 mAh provides up to 150 minutes of continuous operation at maximum brightness. That's enough to complete a photo shoot, video recording, or live stream without stress and without having to reach for the charger frequently. A full charge takes about 130 minutes and is done via a 5V 2A USB-C port. Importantly, the device can also operate while charging, allowing for uninterrupted operation even during hours-long recordings or live events.

Magnetic Mounting and Full Positioning Freedom

The TL98C DMX is equipped with magnetic sides that allow you to quickly attach the light to metal surfaces. This makes it easy to position the light at an unusual angle, set up overhead lighting, or create creative shots without using additional mounts. There are also 1/4" mounting threads on both ends of the housing, allowing you to mount the light on a tripod, arm, or desk stand. This solution offers great flexibility for both professional photo shoots and everyday content creation.

Included

- TL97C light wand
- USB Type-C cable
- User manual

Manufacturer	Neewer
Model	TL98C
Product type	RGB light wand
Number of LEDs	36 cool, 33 warm, 24 RGB
Maximum power	4.5 W
Maximum illuminance	360 lux at a distance of 0.5 m
Color temperature	2500 K-10,000 K
Color mode	HSI/CCT/FX
CRI/TLCL	97
Dimming	0-100%
Saturation: 0-100%	Color wheel
0-360°	Special stage effects
17	Wireless control via app
Yes	Input
5 V 2 A	Battery capacity
3.7 V 3200 mAh	Run time
