

Darkflash DG360 CPU Cooler (Black)

Model: DG360 Black

Manufacturer: DARKFLASH

EAN: 4711527002731

Product Code: 1090734

R1,995

Darkflash DG360 CPU Cooler (Black)

The DarkFlash DG360 is an all-in-one liquid cooler that combines performance with easy installation and tidy cable management. The design features a water block with a copper base, an aluminum radiator, 400 mm IIR + EPDM tubing, and three 120 mm fans integrated into a single module. The system supports select Intel and AMD processors, and the pump, operating at approximately 600–3000 RPM, helps maintain a stable temperature even under heavy load. The whole setup is complemented by striking ARGB lighting.

Water block with a copper base and lighting

The water block stands out with its striking, colorful lighting, which fits well with modern computers. The ability to rotate the head ensures that the visual effect remains consistent regardless of the component layout inside the case. The copper base effectively dissipates heat from the processor, while the plastic housing helps maintain a lightweight and aesthetically pleasing design.

Stable cooling even under heavy load

The DG360 is designed to work with high-performance Intel and AMD processors, making it ideal for gaming PCs and systems handling demanding workloads. The pump, operating at 600–3000 RPM, ensures efficient fluid circulation, and its noise level is only about 15 dBA, helping to maintain a quiet operating environment. Additionally, the high-density aluminum heatsink increases the heat dissipation surface area, helping maintain stable temperatures during long gaming sessions, rendering, or multitasking.

Integrated 3-in-1 fan module

Three fans have been integrated into a single module and factory-attached to the heatsink, simplifying installation and improving the appearance of the computer's interior. They offer airflow of up to 81.5 CFM and static pressure of up to 2.3 mmH₂O, and feature durable hydraulic bearings with a lifespan of up to 40,000 hours. An additional advantage is their quiet operation—the maximum noise level is only about 36 dBA. Added to this is the PWM function, which automatically adjusts fan speed to CPU temperature within a range of 600 to 1800 RPM.

ARGB Synchronization and Single Cable

The cooler enables ARGB synchronization with the latest motherboards—it supports, among others, ASUS Aura Sync, ASRock Polychrome Sync, and RGB Fusion 2.0. Connection is via a 5V 3-pin ARGB connector. Additionally, a single cable with a 5V 3-pin ARGB and 4-pin PWM connector simplifies installation, reduces cable clutter inside the case, and helps prevent mistakes.

Durable tubing and refined design

The tubing, made of IIR + EPDM, ensures good wear resistance and supports long-term, stable system operation. It is also distinguished by its distinctive braiding, which improves aesthetics and durability. The kit also includes thermal paste and mounting accessories, making it easy to prepare the cooling system for installation and achieve a clean, professional finish.

- Radiator and pump
- 3 x 120 mm fans
- User manual
- Set of mounting screws
- Accessory kit
- Thermal paste

Manufacturer	DarkFlash
Model	DG360
Color	Black
Water block dimensions	84.5 × 70 × 47.2 mm
Water block material	Block – copper, housing – plastic
TDP	320 W
Pump speed	600–3000 ±10% RPM
Pump voltage	DC 12 V
Pump noise level	15 dBA
Heat sink material	High-density aluminum
Water reservoir dimensions	394 × 120 × 27 mm
Hoses	Weaving slide hoses
Cable length	400 mm
Fan dimensions	120 × 120 × 25.4 mm (3 pcs.)
Bearing	Hydraulic
Speed control	PWM
Fan speed	600–1800 ±10% RPM
Maximum fan noise level	36 dBA
Maximum airflow	81.5 CFM
Maximum static pressure	2.3 mmH ₂ O
Fan lifespan	Up to 40,000 hours

Intel compatibility LGA 1200 / 115x / 1700 / 18xx
