Hcalory P60M+ Car Cooler with Bluetooth

Travel becomes much more comfortable when your favorite drinks are perfectly chilled and your food supplies stay fresh regardless of the conditions. The Hcalory P60M+ combines a large 60-liter capacity, efficient cooling using an original LG compressor, two independent temperature zones, and convenient control via a touchscreen panel and Bluetooth app. With a wide temperature range from -20°C to 20°C, the unit can function as both a refrigerator and a freezer, adapting to various needs during travel, work, and everyday use. Its well-thought-out design, featuring wheels, a telescoping handle, quiet operation, and battery protection, makes it a practical solution for cars, RVs, boats, vacation homes, and even your home. This appliance is designed to provide convenience, safety, and full control over stored food wherever reliability matters.

Fast cooling without long wait times

At the heart of the Hcalory P60M+ is an original LG compressor, which ensures high cooling efficiency and stable operation. The refrigerator allows you to adjust the temperature from -20°C to 20°C, giving you great flexibility in storing various items—from fresh fruits and beverages to meat, seafood, and frozen foods. The temperature can drop from 20°C to 0°C in about 15 minutes, and to -20°C within an hour, which is particularly useful when you need to quickly cool the contents before continuing your journey. You can also choose between ECO mode, designed for energy savings, and Max mode, intended for rapid temperature reduction.

Two zones, greater storage convenience

With a 60-liter capacity, the Hcalory P60M+ performs well on both short trips and longer journeys when you need to bring significantly more supplies. The interior is divided into two separate compartments with individual doors, allowing the unit to function as a practical combination of a refrigerator and freezer. Independent temperature control for each zone lets you conveniently store items with different requirements without sacrificing space or functionality. You can simultaneously chill drinks, fruits, and snacks, while keeping meat, fish, or frozen foods in the other compartment.

A design built for many scenarios

A sturdy telescoping handle and durable wheels make transport easy, so moving the refrigerator from your car to a summer cottage, boat, or campsite is no problem. Another major advantage is its very quiet operation, with noise levels not exceeding 45 dB, allowing you to relax without annoying noise. The design, which can withstand tilts of up to 45°, increases stability on uneven roads and when driving over more challenging terrain. In everyday use, you'll also appreciate practical features such as the built-in drain plug, interior LED lighting, and the temperature memory function, which restores previous settings upon restart. All of this comes in a compact design, ensuring the refrigerator fits in most cars, trucks, RVs, and home spaces.

Controls that adapt to you

The Hcalory P60M+ interface is designed to be convenient and intuitive for users of all ages. The device can be controlled in two ways (via the touch panel or remotely via Bluetooth), giving you greater freedom to adjust settings without having to approach the cooler directly. The settings memory function ensures that when the appliance is turned back on, it restores the saved

parameters, saving time and eliminating the need to reconfigure it each time.

Safe power supply and battery protection

The Hcalory P60M+ is designed to operate in a variety of conditions, which is why it offers three power options. The kit includes three adapters (220–240 V AC mains power, 12 V DC power, and the option to connect to solar power), significantly expanding the device's range of applications. The refrigerator can be used in a car, truck, home, dorm, summer cottage, RV, on a boat, and outdoors, providing great flexibility regardless of your location. A very important feature is the three-stage car battery protection, which helps prevent excessive discharge of the vehicle's battery. This solution enhances safety and allows you to travel with greater peace of mind, without worrying about problems restarting the car after a stop.

Ready to use right out of the box

The Hcalory P60M+ model comes equipped with a car charger and an adapter with a 220 V European plug, allowing you to use it immediately after connecting in European countries and in most vehicles. This practical feature eliminates the need to purchase additional accessories to get started and makes the device ready to use almost immediately after unpacking. If you're looking for a spacious, versatile, and easy-to-use car cooler that works well for both weekend trips and everyday use, the Hcalory P60M+ is the perfect choice for you!

Included

- Hcalory car cooler with two cooling zones
- Power cable for the cigarette lighter socket
- Power cable
- AC adapter
- Cutting board
