

HiBREW H10A temperature- controlled flask espresso machine

Model: H10A

Manufacturer: HiBREW

EAN: 6975702150299

Product Code: 1091417

R5,159

HiBREW H10A temperature-controlled flask espresso machine

Every cup can be perfect - all it takes is the HiBREW H10A flask pressure maker and a little of your creativity. The 19 bar pressure ensures deep flavor extraction, while the temperature control allows you to match brewing conditions to the type of beans. The steel construction, built-in pressure gauge and 58mm portafilter guarantee professional results at home. Added to this is the ability to adjust coffee capacity, the advanced Thermoblock heating system and intuitive operation. Experience that coffee tastes best when you have control over every step of its preparation.

Intense flavor and velvety crema

A 19-bar pump allows you to extract the full flavor from each bean. As a result, the coffee has an intense aroma and a thick, golden crema, typical of espresso served in the best cafes. The ability to adjust the volume of the drink allows you to prepare both single and double servings to suit individual preferences.

Temperature control

The temperature is crucial to the taste of the brew, so the HiBREW H10A allows you to fine-tune it from 90 to 95°C. A lower temperature will work well with light-roasted beans, while a higher temperature will emphasize the intensity of dark-roasted coffee. In addition, the espresso machine offers a 25°C mode for preparing cold brew, ideal for warm days.

Thermoblock heating system

Temperature stability is the foundation of good coffee. The HiBREW H10A uses Thermoblock technology, which features an extended 53-centimeter steel heating tube. The solution used provides more even heating of water and better thermal stability compared to standard aluminum heating systems, resulting in better flavor extraction.

Customize each serving to your preference

The machine allows you to fine-tune the volume of your beverage. For a single coffee, values from 35 ml to 150 ml are available, and for a double coffee, from 70 ml to 300 ml. Adjustments are made in 5 ml increments, allowing full personalization. This allows you to get an espresso of ideal intensity or a more watered-down version, similar to an americano.

Real-time extraction control

The built-in pressure gauge allows you to monitor the pressure in real time during brewing, which is crucial for those who want to fine-tune the extraction process - from the degree of grinding of the coffee, to its whipping in the portafilter, to the optimal brewing time.

Care is delete

The HiBREW H10A is equipped with a 58mm portafilter, which is capable of holding 520g of coffee and ensures an even flow of water. The included steel tamper allows for precise coffee whipping, which is crucial for proper extraction. The steel construction of the portafilter and filter baskets improves the heat stability and durability of the accessory. Cappuccino and latte lovers, on the other hand, will appreciate the steam nozzle with 270° rotation, which enables precise milk frothing. Adjusting the intensity of the steam ejection allows you to adjust the process to the desired consistency - from a light, aerated foam to a thick, creamy texture.

Robust construction

The coffee maker is made of stainless steel, which guarantees durability and an elegant appearance. The practical heated cup tray keeps the dishes at the right temperature, and the transparent 1.8-liter water tank makes it easy to monitor the water level. A removable drip tray with a level indicator prevents overfilling. On the other hand, the transport handle makes it easy to carry the device.

Personalized settings and intuitive operation

The machine is controlled via an easy-to-read panel with intuitive buttons. The ability to adjust temperature, beverage volume, steam intensity and preinfusion allows you to customize every detail. A factory reset function allows for a quick reset if you experiment with parameters.

Included:

- HiBREW H10A temperature-controlled flask espresso maker.
- Single coffee strainer
- Double coffee strainer
- Cleaning brush + measuring spoon
- Milk jug (450 ml)
- Portafilter 58 mm
- Stainless steel tamper 58 mm
- User manual
