

HiBREW H10A piston espresso machine with temperature control (black)

Model: H10A-black

Manufacturer: HiBREW

EAN: 6975702150688

Product Code: 1091420

R5,227

HiBREW H10A piston espresso machine with temperature control

Every cup can be perfect – all you need is the HiBREW H10A piston espresso machine and a little creativity. The 19 bar pressure ensures deep aroma extraction, and the temperature control allows you to adjust the brewing conditions to the type of beans. The steel construction, built-in pressure gauge, and 58 mm portafilter guarantee professional results at home. Add to that the ability to adjust the coffee capacity, an advanced Thermoblock heating system, and intuitive operation. See for yourself that coffee tastes best when you have control over every stage of its preparation.

Intense flavor and velvety crema

The 19-bar pressure pump allows you to extract the full flavor from each bean. This gives the coffee an intense aroma and a thick, golden crema, typical of espresso served in the best cafes. The ability to adjust the beverage capacity allows you to prepare both single and double servings, tailored to your individual preferences.

Temperature control

Temperature is crucial for the taste of the brew, which is why the HiBREW H10A allows you to precisely adjust it between 90 and 95°C. A lower temperature is suitable for light roast beans, while a higher temperature will emphasize the intensity of dark roast coffee. In addition, the machine offers a 25°C mode for preparing cold brew, ideal for warm days.

Thermoblock heating system

Temperature stability is the foundation of good coffee. The HiBREW H10A uses Thermoblock technology, which features an elongated 53-centimeter steel heating element. This solution ensures more even water heating and better thermal stability compared to standard aluminum heating systems, which translates into better flavor extraction.

Adjust each serving to your preferences

The coffee machine allows you to precisely adjust the volume of the drink. For a single coffee, values from 35 ml to 150 ml are available, and for a double coffee, from 70 ml to 300 ml. The adjustment is made in 5 ml increments, allowing for full customization. This allows you to obtain an espresso with the perfect intensity or a more diluted version, similar to an americano.

Real-time extraction control

The built-in pressure gauge allows you to monitor the pressure during brewing, which is crucial for those who want to refine the extraction process – from the degree of coffee grinding, through tamping in the portafilter, to the optimal brewing time.

Attention to detail

The HiBREW H10A model is equipped with a 58 mm portafilter that can hold 520 g of coffee and ensures even water flow. The included steel tamper allows you to tamp the coffee precisely, which is crucial for proper extraction. The steel construction of the portafilter and filter baskets improves the thermal stability and durability of the accessories. Cappuccino and latte lovers will appreciate the 270° rotating steam nozzle, which allows for precise milk frothing. The steam intensity control allows you to adjust the process to the desired consistency – from light, aerated foam to a thick, creamy texture.

Solid construction

The coffee machine is made of stainless steel, which guarantees durability and an elegant appearance. A practical heated cup tray keeps the cups at the right temperature, and a transparent 1.8-liter water tank makes it easy to check the water level. A removable drip tray with a level indicator prevents overflow. A carrying handle allows for easy transport of the device.

Customizable settings and intuitive operation

The coffee maker is controlled via a clear panel with intuitive buttons. The ability to adjust the temperature, beverage volume, steam intensity, and pre-infusion allows you to customize every detail. The factory reset function allows for a quick reset when experimenting with settings.

Included in the set

- HiBREW H10A piston espresso machine with temperature control
- Single coffee filter
- Double coffee filter
- Cleaning brush + measuring spoon
- Milk jug (450 ml)
- 58 mm portafilter
- 58 mm stainless steel tamper
- User manual
