Product Code: 1091678

R5,681

AMZCHEF Piston Coffee Machine

The AMZCHEF CE-CM5560-SV piston coffee machine is a model with a built-in grinder (20-step grind adjustment), a 20-bar pump, and a 1400 W heating system, equipped with dual PID + NTC temperature control with three setting levels. It offers adjustable grinding and extraction times, 8-level pre-infusion, and an intuitive touchscreen panel with customizable settings. It allows you to prepare espresso, milk-based coffees, and hot and cold beverages (brewed directly over ice), and the whole unit is complemented by a steam wand and a 1.8-liter water tank.

Stable extraction and consistent flavor

The 20-bar pressure ensures effective extraction of aroma and oils from the coffee, resulting in a distinct flavor and crema. The PID + NTC system controls the temperature during brewing, ensuring

stable extraction without significant fluctuations. This is particularly important with frequent use, as each subsequent cup can taste very similar without the need for constant adjustment of settings.

Built-in grinder and precise grind adjustment

The 20-step grind adjustment allows you to go from coarse, through medium, to fine, which has a real impact on the character of the brew. A coarser grind accelerates water flow and makes the coffee milder, while a finer grind prolongs extraction and enhances its intensity. Additionally, grinding time adjustment within a 5–35-second range allows you to tailor the amount of coffee to a specific serving, making it easy to prepare both single and double espressos.

8-level pre-infusion - more even brewing

The 8-stage pre-infusion system gradually moistens the ground coffee before the actual extraction, improving brewing conditions. This ensures that water is distributed evenly throughout the coffee bed, reducing the risk of uneven channels forming. As a result, the brew is more balanced, and individual flavor notes are more pronounced.

Precise control via the touch panel

The LED touch panel allows for convenient control of all key machine functions from a single location. The ability to set the grinding and extraction times gives you greater control over the coffee-making process, which will be appreciated by those who like to fine-tune the flavor to their preferences. The personalization feature allows you to quickly return to your favorite settings after saving them, without having to reconfigure them each time.

Steam function and everyday convenience

The steam wand allows you to froth milk, enabling you to prepare drinks such as cappuccino or latte at home. The ability to dispense hot water increases the machine's functionality, for example when preparing tea or an Americano. The removable 1.8-liter water tank and detachable drip tray make cleaning easy, while the automatic shut-off feature after 15 minutes reduces energy consumption and enhances safety.

Included

- AMZCHEF CE-CM5560-SV piston espresso machine
- Portafilter
- Single shot filter basket
- Double shot filter basket
- Tamper with wooden handle
- Measuring scoop with tamper function
- Dosing ring
- Bean container

Manufacturer	AMZCHEF
Model	CE-CM5560-SV
Pressure	20 bar
Power	1400 W
Temperature control system	PID + NTC (3 levels)
Extraction time	17-100 s / 32-100 s
Grinder	Yes
Number of grind settings	20
Grinding time	5-35 s
Water tank capacity	1.8 L (removable)
Color	Silver

Gross weight: 6850, Net weight: 6200, Box length: 32,50, Box width: 28,00, Box height: 40,50, GPSR
