

Maono PD200W dynamic microphone (Black)

Model: PD200W

Manufacturer: MAONO

EAN: 6972237684138

Product Code: 1091909

R2,553

Maono PD200W Dynamic Microphone (Black)

The Maono PD200W is a dynamic wireless microphone that combines flexibility, high sound quality and convenience. It can work without a cable thanks to 2.4 GHz connectivity, and can also connect wired via USB or XLR - depending on whether you're creating at home, streaming live or operating in a professional studio. It also offers a range of up to 60 meters, up to 60 hours of operation on a single charge, and full compatibility with phones, tablets, computers and consoles. On top of that, you get built-in noise reduction, RGB backlighting with 16.8 million colors and the ability to record two tracks simultaneously.

Record the way you want

The PD200W gives you complete freedom in how you connect - use 2.4GHz wireless technology when you need freedom of movement, or switch to USB when you want to quickly start recording without installing drivers. For more advanced applications, like podcasts with a mixer or studio recording, you can use the classic XLR connector. The microphone also supports simultaneous connections with two transmitters and one receiver (2TX + 1RX), making it great for duo work.

Full control over the sound

Built-in volume control, sensitivity control, one-click quick mute mode and RGB color switch - all accessible directly from the microphone. This means you don't have to search for settings on your computer - you adjust everything on the spot, even while recording. The microphone works with the Maono Link app (for Windows and macOS), which lets you adjust the equalizer, compressor or limiter even more precisely to make the sound match your voice and style.

Distortion-free sound

The PD200W uses a 30mm dynamic capsule with a cardioid characteristic to capture your voice with high precision while suppressing background noise. With built-in three-stage noise cancellation, the microphone provides clear and crisp sound regardless of conditions. You can record at home, in a coffee shop or during a live broadcast - your voice will always sound professional.

Record as a duo

With the A/B Dual Track feature, you can record two audio tracks separately - ideal for duets, guest podcasts or interviews. This makes later editing and corrections easier, as each person is recorded independently, with no overlapping sounds. In addition, the microphone allows direct connection to the camera, which reduces editing time and speeds up work.

Stable connection and long working time

With a stable wireless connection with a range of up to 60 meters, you don't have to worry about interference or signal dropouts. The rechargeable battery allows for up to 60 hours of operation (with RGB off), which means you can record for days without recharging.

Hear yourself without delay

The built-in 3.5mm jack allows you to monitor your audio in real time. The lack of lag means you can immediately hear what you're recording and can adjust intonation or volume in real time. This is especially important during live broadcasts, podcasts or recordings without replay.

Included

- dynamic microphone
- desk stand
- USB-C to USB-A/USB-C cable
- USB-C receiver
- USB-C to USB-A/USB-C adapter cable
- user manual

Manufacturer	Maono
Model	PD200W
Color	Black
Microphone type	Dynamic
Directional characteristic	Cardioid
Sensitivity	USB: -7.0 dBFS (1 kHz, 94 dBSPL, 0.5 m) XLR: -53.0 dBV (1 kHz, 94 dBSPL, 0.5 m)
Frequency response	50-16,000 Hz
Gain adjustment	0 to +36 dB
Maximum sound pressure (SPL)	128 dB
Monitoring sensitivity	-8.0 dBV
Output impedance (3.5 mm)	32 Ω
Interface	USB-C, XLR
XLR input impedance	580 ± 30% ohms at 1 kHz
Rechargeable battery	2600 mAh, 3.7V (9.62 Wh)

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice.
