

GARRETT AT Gold 5x8 Metal Detector

Model: 1140680

Manufacturer: GARRETT

EAN: 786156004023

Product Code: 1091916

R19,098

GARRETT AT Gold 5x8 Metal Detector

The search for valuable finds takes on a whole new dimension when you have equipment designed for the most demanding conditions. The GARRETT AT Gold 5x8 metal detector combines high sensitivity, advanced signal analysis, and resistance to water and harsh environments, making it ideal for use both on land and in shallow bodies of water. Precise ground balance adjustment, extensive audio modes, and intelligent target identification allow you to focus on finding valuable objects. This is equipment that gives you full control over every signal and lets you make accurate decisions even before you start digging.

Ready for any terrain and any challenge

The design was created with exploration in diverse conditions in mind—from dry, dusty areas to aquatic environments. A construction resistant to dust, dirt, and submersion to a depth of approximately 3 meters means you can continue your search where other devices fail. Whether

you're traversing gold-bearing areas or exploring the bottom of a shallow river, the detector maintains stable operation and high detection efficiency.

Precise detection and full ground control

Advanced ground balancing features allow you to adjust the device's performance to field conditions. You have access to both manual ground balance and the automatic Fast Track mode, which instantly adjusts settings in difficult, mineralized soils. The unique Ground Balance Window feature allows you to expand the balance range, reducing the impact of subtle changes in ground structure. This results in cleaner signals and more reliable object identification.

Audio Modes for Better Detection

Advanced Pro audio modes allow you to detect even the slightest differences in the target signal. The proportional audio response provides information about the size, shape, and depth of the object, while the fast response time makes it easier to distinguish between adjacent finds. The Iron Audio feature allows you to hear ferrous objects that would be muted by other metal detectors. This makes it easier to avoid digging up unwanted items such as bottle caps or washers.

Intelligent Target Identification

The Digital Target ID system, with a clear scale from 0 to 99, allows you to determine the conductivity of the metal even before it is unearthed. Additionally, the Graphic Target Analyzing feature simultaneously displays the target's characteristics and discrimination settings, making it easier to interpret signals. High-resolution iron discrimination with up to 44 levels enables very precise separation of valuable objects from metal waste.

Maximum sensitivity and precise location

The device detects all types of metals, offering great detection depth and high sensitivity to small objects, such as gold nuggets. The adjustable signal threshold allows you to customize the background noise to better capture subtle signals. The electronic pinpointing function allows for precise targeting in All-Metal mode, which significantly reduces search time and increases efficiency.

Complete Ready-to-Use Kit

The kit includes a 5" x 8" PROformance™ DD search coil, which provides an excellent balance between range and precision, and MS-2 headphones, making it easier to pick up the faintest signals in the field. This is a ready-to-use configuration right out of the box, designed to maximize the detector's capabilities in all conditions.

Included

- adjustable housing with S-shaped shaft
- upper and lower shafts (connected)
- wing nut
- mounting washers x2
- threaded screw
- 5" x 8" DD search coil (13 x 20 cm)
- headphones
- user manual

Manufacturer	GARRETT
Model	AT Gold
Coil	5" x 8" PROformance™ DD
Headphones	MS-2 (included)
Water Resistance	up to 3 m, suitable for use in fresh water
Durability	dust-, dirt-, and water-resistant construction
Operating Modes	True All-Metal Mode and 3 discrimination modes
Ground Balance Systems:	manual Ground Balance, automatic Fast Track Ground Balance, Ground Balance Window (extending the ground balance range)
Iron Audio function (AT GOLD™)	audio identification of iron (including filtered iron)
Iron discrimination	44 levels (High-Res Iron Discrim)
