

GARRETT MS-2 W/2P Headphones with Waterproof Connection

Model: 1627310

Manufacturer: GARRETT

EAN: 786156005167

Product Code: 1091919

R3,861

GARRETT MS-2 W/2P Headphones with Waterproof Connection

The Garrett MS-2 W/2P headphones are designed for metal detector users who expect a clear signal, comfort, and reliability while working in the field. They offer a wide frequency response, allowing you to pick up even subtle differences in signals. Equipped with a waterproof 2-pin connector, they perform exceptionally well in demanding conditions. Volume control gives you full control over the audio, and the rugged construction ensures durability during heavy use. This refined solution enhances precision and comfort during every search.

Designed to work with Garrett detectors

The MS-2 W/2P model has been fully optimized for devices such as the Garrett AT Max, AT Pro, AT Gold, and ATX. The 2-pin “AT” connector ensures a stable and secure connection, which is crucial when working in high-humidity environments. The connector’s waterproof design enhances resistance to harsh conditions, ensuring reliable performance where standard solutions may fail.

Clear signal and full control

The headphones offer an impedance of 8 ohms and a wide frequency response range from 30 to 18,000 Hz, resulting in clear, detailed sound. This allows you to better distinguish signals and react faster to potential finds. The built-in volume control allows you to adjust the sound level to your surroundings and personal preferences, which significantly improves your comfort while working in the field.

Comfort even during long sessions

The headphones are designed with comfort in mind for hours-long searches. The soft headband and well-contoured ear cups ensure a proper fit and reduce fatigue. The design is engineered to stay securely on your head without causing excessive pressure.

Reinforced construction for field use

The MS-2 W/2P model is equipped with a durable, 10-foot coiled cable that increases freedom of movement and reduces the risk of damage. The reinforced construction ensures the headphones withstand intensive field use. This solution is designed for demanding conditions where not only sound quality but also equipment durability matters.

MasterSound – quality you can trust

These headphones are part of the MasterSound series, which underscores their high build quality and refined acoustic performance. The use of a dedicated, 2-position Garrett “AT” connector ensures compatibility and a stable connection. It is worth noting that this model is not designed for full submersion; however, thanks to its waterproof connector, it performs well in environments with high humidity.

Manufacturer	GARRETT
Model	MS-2 W/2P
Compatibility	Garrett AT Max, AT Pro, AT Gold, ATX detectors
Connector	2-pin AT-type underwater connector (Garrett)
Headphone type	MasterSound
Volume control	yes, built-in audio signal control
Speaker impedance	8 Ω
Frequency response	30 – 18,000 Hz
Cable	reinforced, coiled (approx. 3 m)

Connector water resistance yes (underwater connector)
