Product Code: 1093453

R1,958

Flextail Tiny Bike Pump Pro Portable Bike Pump (Gray)

The Flextail Tiny Bike Pump Pro is an electric pump designed for cyclists who need a fast and convenient way to inflate tires in any situation. The device generates pressure up to 120 PSI (827 kPa), and thanks to its efficient pumping technology, it can inflate a tire to 80 PSI in about 50 seconds. At the same time, it maintains compact dimensions (77 × 53 × 32 mm) and weighs only 130 g, so it easily fits in a pocket, bike bag, or backpack. The built-in battery, charged via USB-C, allows you to inflate several tires on a single charge.

Fast tire inflation

The pump is equipped with an efficient system that generates pressure up to 120 PSI, making it suitable for both road bikes and other types of bicycles. Inflating a 700 × 25C tire to 80 PSI takes

about 50–60 seconds, and to 120 PSI about 95–105 seconds. The device also handles 29 × 2.2 tires, where reaching 30 PSI takes about 70–80 seconds, and 50 PSI takes about 160–170 seconds.

Practical features

The easy-to-read LED screen lets you monitor the current tire pressure and battery level in real time. You can set the target pressure in PSI or BAR, and the pump will automatically stop inflating once the selected level is reached. This means you don't have to constantly monitor the process—the device ensures precise tire inflation.

Compact and lightweight - perfect for any ride

Thanks to its light weight (130 g) and compact design, the pump is ideal for riding. It fits easily in a cycling jersey pocket or a small saddle bag. It's a practical solution for both training sessions and longer trips.

Versatile use

The Tiny Bike Pump Pro supports Presta and Schrader valves, making it suitable for various types of bikes. The device can inflate tires on road, mountain, electric, folding, and recreational bikes. An additional needle also allows for inflating sports balls.

Surprising performance

The 450 mAh battery allows you to inflate several tires on a single charge. For example, the device can inflate up to 4 700 × 25C tires to 80 PSI, 2 tires to 120 PSI, or 3 29 × 2.2 tires to 30 PSI. This makes the pump ideal both as emergency gear and as a practical tool for everyday rides.

Included:

- Portable bike pump
- USB-C cable
- Waterproof pouch
- Accessories (hose, valve adapters, and ball needle)
