LEPRO ZB1-15 Wi-Fi String Lights, 15 m

The 15-meter LEPRO ZB1-15 Wi-Fi string lights let you create a unique atmosphere on your patio, balcony, in your garden, or at house parties—exactly the way you want it to be that day. Each of the 15 bulbs can glow in a different color thanks to RGB+IC technology with independent control, which opens up vast possibilities for customizing lighting effects. Smart control via the app, voice command support, integration with Alexa and Google Assistant, and the advanced AI LightGPM 4 system make lighting configuration fast, intuitive, and simply enjoyable. The warm 2700K light is perfect for relaxing in the evening, and the ability to expand the set to 30 bulbs allows you to tailor the installation to larger spaces.

Individual lighting for each bulb

The use of RGB+IC LEDs with independent control allows you to assign a separate color to each bulb and create dynamic, multicolored lighting compositions. As a result, this string light is more than just

classic decorative lighting with a single effect for the entire set—you can create your own lighting scenes, color transitions, and animations perfectly tailored to holidays, parties, movie nights, or the everyday atmosphere on your patio. The Lepro app offers far more possibilities than traditional remote controls, and it's constantly updated with new features and ready-made DIY projects that let you make even better use of the lighting's potential.

Warm light for evening relaxation

The string lights dazzle with their colors, but they also create a cozy atmosphere thanks to their subtle light with a color temperature of 2700K. The color, reminiscent of classic incandescent bulbs, is perfect for quiet evenings in the garden, dinner on the patio, or unwinding after work. You can conveniently adjust the brightness in the Lepro app, tailoring the light intensity to the situation. If you don't have your phone handy, simply use the integrated controller on the cord to turn the lights on or off; additionally, the string lights will automatically remember the last mode used.

Lighting designed just for you

The LEPRO ZB1-15 uses the Lepro LightGPM 4 system, which acts as a personal AI-powered lighting designer. Simply tell the app what moods, colors, or effects you like, and the system will start generating suggestions tailored to your preferences. What's more, the AI "learns" from your choices, so over time it gets even better at matching your taste and decor style. This solution lets you move away from repetitive, pre-set presets and create a space with a unique, one-of-a-kind character.

All it takes is a photo to create the right atmosphere

The image recognition feature lets you take a photo of a room or upload an image—such as a movie poster or your favorite video game character—and the LightGPM system will automatically generate matching lighting. This lets you tailor the ambiance to a specific interior, event, or aesthetic in just a few moments—without manually adjusting colors and effects. It's an incredibly convenient solution for anyone who wants to quickly achieve a cohesive look.

Voice control and full smart home integration

The string lights work with Amazon Alexa and Google Assistant, allowing you to control the lighting with simple voice commands. Just say that you want to create a party atmosphere, enhance the holiday spirit, or adjust the lighting to match a movie or video game, and the app will set up the appropriate settings in just a few seconds. Please note that Alexa’s command capabilities are somewhat limited (for example, not all functions involving simultaneous changes to brightness and color are supported directly by the voice assistant).

Expandable to up to 30 bulbs

The set uses a 12V power supply and includes 15 bulbs arranged along a 15-meter cord, which provides great flexibility in arranging the space. The included power supply supports a maximum load of 16.5 W, and the smart controller allows you to connect up to two string lights at the same time. This means you can expand the setup to include up to 30 bulbs, whether connected in series or in parallel. As a result, this lighting is ideal for a small balcony, as well as a larger terrace, patio, or garden lounge area.

Included in the set

- lights
- power adapter
- user manual

Manufacturer	Lepro
Model	ZB1-15
Length	15 m
Additional features	Dimmable, color-changing, energy-efficient, with timer, waterproof
Control methods	Amazon Alexa, app control, button control, voice control
Wireless communication	Bluetooth, 2.4 GHz Wi-Fi
Usage	Outdoor
Light source type	LED
White light brightness	700 lumens
