Insta360 Flow Creator Kit (White)

Create even better videos with your phone. Insta360 Flow is an innovative smartphone gimbal that offers 3-axis stabilization, advanced AI tracking technology, and a host of smart features. Thanks to its powerful 2900 mAh battery, it offers up to 12 hours of runtime. The device also features a built-in selfie stick and tripod, making it perfect for a variety of scenarios. The stabilizer can also function as a power bank. The Creator Kit includes accessories such as extra cables, a carrying case, and lighting.

Unmatched stabilization

With the Insta360 Flow, you can effortlessly create stunning footage. The gimbal uses AI tracking and 3-axis stabilization to ensure incredible smoothness even in the most dynamic shots. Whether you're creating an original travel vlog, recording adorable pets playing, or capturing your child's soccer practice—you'll now achieve fantastic results with ease!

Advanced tracking technologies

The Insta360 Flow makes it easy to keep your chosen subject in the center of the frame. The gimbal supports advanced Deep Track 3.0 tracking technology, allowing you to effortlessly record your target. It also offers additional features such as Zoom Tracking and Slow Motion Tracking. Live Mode is also available, which is perfect for live streaming. What's more, even if your chosen subject briefly disappears from view, Flow will automatically resume tracking as soon as possible!

All-in-one

The Insta360 Flow isn't just a stabilizer—this versatile device can also perform several other functions. The built-in tripod makes it easy to record vlogs or tutorials, and the cold shoe adapter allows you to mount additional accessories, such as a microphone. You also have a selfie stick with a maximum length of 215 mm at your disposal—use it to easily take the perfect selfie or group photo! Flow also works as a power bank—it even lets you charge your phone while recording.

Even more convenient to use

With the Insta360 Flow, you're always ready to go. The gimbal is very easy to use and lets you start filming in a flash. Just unfold it and attach your phone using the magnetic mount! What's more, for iPhones, the Insta360 app automatically detects the stabilizer and sends a notification. Flow also supports gesture control. So, for example, you can set it up on the built-in tripod and then easily start recording!

Simplified Recording

Enjoy greater freedom. Flow is equipped with a special SmartWheel that provides convenient access to many useful features. With it, you can, for example, play back video, control recording, and switch between the gimbal's available modes. For example, in Auto mode, the stabilizer automatically adjusts its settings to the user's movements, while FPV mode lets you capture dynamic footage reminiscent of drone shots.

Try out the available modes

Create original content with minimal effort. The Insta360 app offers plenty of interesting features to make it easy! Shot Genie will guide you on how to create the perfect footage and provides over 80 templates to choose from, while Hoop Mode is perfect for recording basketball games. Panorama lets you capture the entire landscape, Dolly Zoom helps you achieve that iconic Hollywood effect, and with TimeShift, you can easily create a hyperlapse. A Motion Timelapse feature is also available. You can edit your finished videos using the FlashCut app.
