

ZEUSLAP Z15ST Portable Monitor with a 15.6 Touchscreen

Model: Z15ST

Manufacturer: ZEUSLAP

EAN: 6974065450077

Product Code: 1094574

R3,861

ZEUSLAP Z15ST Portable Monitor with a 15.6" Touchscreen

The ZEUSLAP Z15ST portable monitor features a 15.6-inch Full HD (1920×1080) touchscreen built using IPS technology, offering wide 178° viewing angles, 10-point multitouch support, and a brightness of 250 cd/m². The model is equipped with a panel offering basic color reproduction (approx. 66% sRGB, 6-bit – 262,000 colors) and a contrast ratio of 800:1, which works well mainly for everyday use. The monitor supports USB-C and mini HDMI connections, making it easy to connect to a laptop, smartphone, or game console. Its lightweight and compact design makes it easy to use while traveling and outside the office.

An image for everyday use

The IPS panel ensures a stable image and good viewing angles, making it easy to work in various positions and locations. Full HD resolution translates to legible text and a clear image during office work or web browsing. Color parameters are basic, so the monitor is best suited for simple tasks such as documents, web browsing, or occasional multimedia. This is not a device intended for professional graphics editing or color work.

The touchscreen in practice

10-point touch support allows for convenient control without additional accessories. This lets you navigate the system faster, scroll through content, or use apps that require interaction. This feature works well during presentations or mobile work. The touch response is smooth, which translates to a comfortable user experience.

Wide compatibility

The monitor can be connected via USB-C or mini HDMI, offering considerable flexibility in device selection. In practice, this means easy compatibility with laptops, smartphones, and gaming consoles. Support for desktop modes on phones further enhances the monitor's functionality. A single device can thus serve as an additional screen for work and entertainment.

Portability and design

Its compact dimensions and weight of approximately 770 g make the monitor easy to take with you on the go. The slim chassis doesn't take up much space in a bag, which is important for mobile work. Built-in speakers and a headphone jack allow you to use the monitor without additional equipment. This is a practical solution for people who need a second screen outside the office.

Eye comfort

The monitor features a blue light reduction mode that helps reduce eye strain during extended use. The ability to adjust this mode allows you to customize the settings to your needs. A brightness level of 250 cd/m² is sufficient for indoor use. This makes the monitor suitable for daily, extended use.
