Product Code: 1094581

R3,536

ZEUSLAP Z10T Portable Monitor with 10" Touchscreen

The ZEUSLAP Z10T portable monitor with a 10.5-inch touchscreen is a compact IPS display with FHD+ resolution (1920×1280) in a 3:2 aspect ratio, which provides more vertical workspace than the classic 16:9 format. It offers 100% sRGB coverage, 420 nits of brightness, and a 1500:1 contrast ratio, resulting in a clear and natural image. Support for 10-point touch, a wide range of ports (USB-C, Mini HDMI, 3.5 mm jack), and a slim, 10 mm-thick metal chassis make this solution convenient for both mobile work and everyday use.

An image tailored for work and entertainment

The IPS panel ensures wide viewing angles, so the image remains clear regardless of the screen's orientation. FHD+ resolution (1920×1280) in a 3:2 aspect ratio provides more space for documents,

web pages, or apps, which significantly improves work comfort. Thanks to 100% sRGB, colors are more natural, which is useful not only for watching movies but also for simple graphic tasks.

Touch that speeds up operation

The 10-point touch feature allows for convenient finger control—you can zoom, scroll, and perform gestures just like on a smartphone or tablet. In practice, this means faster work without the need for additional accessories. The OSD settings menu can be accessed with a two-finger gesture, simplifying adjustments to image parameters. On macOS, single-point touch is available, which still allows for basic operation.

Easy connectivity with various devices

The monitor is equipped with a set of ports that makes it easy to connect to a laptop, smartphone, or game console. The Mini HDMI port handles video and audio transmission, while the USB-C ports support both power delivery and data transfer. The OTG feature allows you to connect a mouse or keyboard, enhancing your comfort while working on the go. DEX mode lets you use your smartphone like a computer, and the screen extension feature is ideal for multitasking.

Slim design and mounting options

With a 10 mm-thick chassis and dimensions of 232 × 164 mm, the monitor is easy to take with you. The metal construction enhances durability, which is important when moving it frequently. Additionally, the device can be mounted on a stand using the VESA 75×75 mm*2 standard, providing greater flexibility in organizing your workspace.

Basic audio without additional devices

The monitor is equipped with two built-in speakers, each with 1 W of power. This configuration works well for basic applications, such as system notifications, calls, or occasional multimedia playback without the need to connect headphones.

Complete starter kit
