

BlitzWolf BW-P23 100W 14,000mAh Power Bank

Model: BW-P23

Manufacturer: BLITZWOLF

EAN: 5905156104501

Product Code: 1095862

R1,776

BlitzWolf BW-P23 100W 14000 mAh Power Bank

The BlitzWolf BW-P23 100W 14000 mAh power bank is a compact power source that combines high charging power with a portable design. It offers a maximum power output of 100W, making it suitable not only for smartphones but also for laptops, including MacBooks. The 14,000 mAh capacity allows for multiple device charges, and the smart display provides full control over operating parameters in real time.

Fast charging up to 100W

The BW-P23 supports fast charging up to 100W, which significantly reduces charging time. In practice, this means a MacBook Air can reach about 57% in 30 minutes, and a smartphone up to 65% in the same time. This makes the power bank ideal for situations where time is of the essence

and quick access to power is crucial. High power translates to greater versatility and the ability to charge more demanding devices.

14,000 mAh capacity and real-world performance

The 14,000 mAh capacity allows for multiple smartphone charges and a single laptop charge. For example, an iPhone can be charged about 2.5 times, and a Samsung Galaxy S24 Ultra about 2 times. This performance makes the power bank ideal for travel or during a busy day away from home. Users gain greater independence from electrical outlets.

Smart display and parameter control

The device features a color screen that displays key information in real time. Users can check the battery level, current charging power, and voltage and current for each port. Additionally, the estimated runtime and the time required to fully charge the power bank are displayed. This makes it easier to monitor energy consumption and plan device charging.

Wide compatibility and various ports

The power bank features a USB-C port (input/output) and a USB-A port, allowing you to charge two devices simultaneously. Support for PD, QC, AFC, and SCP protocols ensures compatibility with a wide range of devices, from smartphones to laptops. This means a single power bank can replace several chargers. This solution is convenient for both everyday use and travel.

Compact design and portability

The vertical column-shaped casing makes the device handy and easy to carry. Weighing approximately 330 g and with compact dimensions, the power bank fits easily into a backpack or bag. The metallic finish enhances durability and gives the device a modern look. As a result, this model works well as a mobile power source for everyday use.

Safety and device protection

The BlitzWolf BW-P23 is equipped with a set of safety features that protect both the power bank and connected devices. These systems guard against overcharging, overvoltage, short circuits, overheating, and over-discharging. Additionally, safeguards against signal interference and excessively low temperatures enhance operational stability. As a result, users can use the device without worrying about the safety of their equipment.

Included

- power bank
- user manual

Manufacturer	BlitzWolf
Model	BW-P23
Battery capacity	14000 mAh
Battery type	Lithium-ion (Li-Ion)
Display	TFT
USB-C input	5V□ 3A, 9V□ 3A, 12V□ 3A, 15V□ 3A, 20V□ 2.25A (max. 45 W)
USB-C output	5V□ 3A, 9V□ 3A, 12V□ 3A, 15V□ 3A, 20V□ 5A (max. 100 W)
USB-A Output	5V□ 3A, 9V□ 2A, 10V□ 2.25A, 12V□ 1.5A (max. 22.5 W)
Total Output	5V□ 3A (max. 15 W)
Dimensions	140 × 44 × 34 mm
Weight	330 g
