

Lindy 30402 power cable Black 3 m IEC C14 IEC C15

Model: 30402

Manufacturer: LINDY

EAN: 4002888304023

Product Code: 1095938

R726

The IEC C14 to IEC C15 Mains Extension Cable is a professional-grade power solution designed to extend the connection between equipment requiring secure, heat-resistant AC power. Featuring an IEC C14 plug (male) to IEC C15 connector (female) configuration, this cable is ideal for use in data centers, broadcast systems, and Pro AV environments where reliability and performance are critical.

The Lindy C14 to C15 Extension cable supports up to 10A at 250V AC and is specifically designed for high-temperature applications up to 120°C. The C15 connector includes a notch and higher heat tolerance compared to the standard C13, making it suitable for equipment that undergoes hot conditioning or operates continuously under elevated temperatures such as servers, UPS systems, and network switches.

The robust molded connectors and flexible, flame-retardant PVC jacket ensure durability and safe operation during extended use. Each cable is electrically tested and hot-condition rated,
