EAN: 6974065450305

Product Code: 1096188

R3,884

ZEUSLAP P15AT Portable Monitor with a 15.6" Touchscreen

The ZEUSLAP P15AT portable monitor features a 15.6-inch touchscreen with Full HD resolution (1920×1080), based on an IPS panel with 178° viewing angles, 250 nits of brightness, and a 800:1 contrast ratio. The model offers basic color coverage at 66% sRGB (47% NTSC) and 6-bit color depth (262,000 colors), indicating its typically utilitarian nature. The monitor supports connections via USB-C (power and video), mini HDMI, and Micro USB, allowing it to work with laptops, smartphones, and game consoles. The design is approximately 10 mm thick, and the weight is 650 g for the monitor alone or about 1010 g with the case that doubles as a stand.

IPS Screen and Daily Use

The IPS panel provides wide viewing angles, meaning the image remains clear even when viewed from the side. In practice, this comes in handy during teamwork or when viewing content with a group of people. The Full HD resolution allows for comfortable work with documents and browsing the internet without visible pixels. Touchscreen functionality simplifies navigation, especially when using a smartphone or systems that support touch controls.

Colors and Display Capabilities

66% sRGB coverage and 6-bit color depth mean the monitor offers basic image quality suitable for everyday use. In practice, the colors are sufficient for movies, office work, or gaming, but this is not equipment for precise graphic design. The smaller number of displayed colors may cause visible tonal transitions in more demanding content. On the other hand, these specifications help keep the price lower and the device more energy-efficient.

Portability and design

The slim chassis makes it easy to transport, and the included case doubles as a stand, eliminating the need for additional accessories. However, it's worth noting that the full set weighs about 1 kg, which is a more realistic figure for everyday use. The metal construction improves durability and makes the monitor better suited for frequent movement. The whole setup fits well with mobile applications, such as working on the go or as an additional screen for a laptop.

Connectivity and Compatibility

The presence of USB-C ports with Power Delivery support allows you to simultaneously transmit video and power the monitor, which simplifies workstation setup. Mini HDMI allows you to connect consoles and other devices without USB-C. Support for the HDCP 1.4 standard enables playback of content from streaming services in Full HD quality. This set of connectors makes the monitor easy to adapt to various usage scenarios.

Work, multimedia, and gaming

A 3ms response time ensures the screen handles dynamic visuals well, which is important during gaming. The monitor can function as a second screen for a laptop, expanding your workspace and

facilitating multitasking. The smartphone mirroring feature allows for more convenient use of apps on a larger screen. For consoles, the portable format enables gaming outside of a standard setup.

Additional features and details

The monitor features built-in 2×1 W speakers, which are sufficient for basic audio, such as notifications or simple content in a quiet environment. VESA mounting holes are located on the back of the housing, allowing for installation on a mount or arm. The package includes various cables, allowing you to connect the monitor to most devices right away. The included power adapter offers standard PD profiles (5V/3A, 9V/2A, 12V/1.5A), ensuring compatibility with popular power sources, though it does not support fast charging.

Included

- ZEUSLAP P15AT Monitor
- AC Adapter
- USB-C to USB-C Cable
- USB-A to USB-C Cable
- Mini HDMI to HDMI Cable
- Micro USB to USB Cable
