ZEUSLAP P16 16" 120Hz Portable Gaming Monitor

The ZEUSLAP P16 portable gaming monitor features a 16-inch IPS display with WUXGA resolution (1920×1200, 16:10 aspect ratio), a 120 Hz refresh rate, and a 3 ms response time, making it ideal for both gaming and mobile work. With 400 nits of brightness, a 1500:1 contrast ratio, and 100% sRGB coverage, it delivers a clear and natural image for most everyday uses. Its lightweight design (approx. 692 g) and slim profile (approx. 10 mm) make it easy to transport, so the monitor fits easily into a laptop bag. It features USB-C 3.1 and mini HDMI 1.4 ports, allowing you to easily connect various devices—from laptops and computers to consoles and smartphones.

Smooth visuals and fast response

A 120 Hz refresh rate combined with a 3 ms response time results in noticeably smoother visuals and reduced motion blur. In practice, this means a more comfortable gaming experience, especially in fast-paced titles where reaction speed and the clarity of moving details matter. These specs also

prove useful in everyday use, as scrolling through web pages or navigating the system interface is smoother. As a result, the monitor doesn't strain your eyes during extended use and provides a more natural visual experience.

More space thanks to WUXGA

The 1920×1200 WUXGA resolution offers more vertical workspace than standard 1920×1080 screens. As a result, you can work more comfortably on documents, spreadsheets, or web pages without having to constantly scroll. The 16:10 aspect ratio makes the screen better suited for office work and multitasking, which is particularly useful when traveling. This solution effectively boosts productivity on an additional monitor.

Colors and User Comfort

The IPS panel with 100% sRGB coverage ensures natural color reproduction, which is important for both multimedia viewing and graphic design work. The 400-nit brightness allows for comfortable work in most well-lit rooms and in shaded outdoor areas. The matte finish reduces glare, improving readability and reducing eye strain during longer sessions. Wide viewing angles ensure the image remains clear regardless of your position.

Wide Compatibility and Connectors

The monitor supports connections via USB-C 3.1 and mini HDMI 1.4, ensuring broad compatibility with various devices. It can be connected to a laptop, computer, console, or smartphone supporting desktop mode, making it a versatile tool for work and entertainment. It's worth noting that power is supplied via 5V/3A, so in some cases an external charger may be required. Thanks to a simple plug-and-play system, setup is quick and doesn't require installing additional software.

Audio and Additional Features

The monitor is equipped with two built-in stereo speakers (8Ω/1W), which are suitable for basic multimedia applications such as watching movies or video calls. For those seeking better sound quality, a 3.5 mm audio jack is available for connecting headphones or external speakers. The device also supports the VESA 75×75 mm standard, allowing it to be mounted on a stand or wall. This
