ZEUSLAP AT156 15.6" Portable Monitor

The ZEUSLAP AT156 15.6" Portable Monitor is a compact Full HD 1920 × 1080 IPS display that works well as a secondary screen for laptops, smartphones, game consoles, and other compatible devices. The model offers a 60 Hz refresh rate, a wide 178° viewing angle, HDR support, a touchscreen, and 16:9 and 4:3 aspect ratios. With USB-C, mini HDMI, USB-C PD, and 3.5 mm audio ports, as well as PD power support, the monitor can be easily connected at home, in the office, and on the go. The slim design, measuring 5 to 10 mm thick, weighing 637 g, and including a carrying case, makes it easy to transport and comfortably position the screen while working, studying, or enjoying entertainment.

15.6" Full HD Screen for Work and Multimedia

The 15.6" IPS panel delivers a clear image in Full HD resolution, making the monitor well-suited for everyday tasks like working with documents, browsing the web, watching movies, or gaming. The 16:9 aspect ratio is convenient for most multimedia applications, and the 1920 × 1080 resolution

maintains good image detail without overburdening the connected device. It's a practical solution when your laptop screen is too small or you need additional workspace.

IPS panel with a wide 178° viewing angle

The IPS panel offers a wide 178° viewing angle, ensuring the image remains clear even when viewed from the side. This is important during presentations, when watching content together, or when working in less typical settings, such as while traveling. The screen maintains color stability from various angles, which improves the comfort of using the monitor not only at your desk.

Touchscreen functionality for added convenience

The ZEUSLAP AT156 is equipped with a touchscreen that makes it easy to control compatible devices without having to constantly reach for a mouse. The touch function can be useful when operating applications, scrolling through pages, presenting materials, or working with the system interface. This is particularly convenient when the monitor is paired with a smartphone that supports desktop mode or a laptop that supports an external touchscreen.

An Additional Screen for Your Laptop

The monitor can function as a second screen, helping you organize your workspace. You can use mirroring mode, desktop extension, or have it operate as an independent auxiliary screen, depending on the capabilities of the connected device. This allows you to have a document, spreadsheet, or messenger on one display, and a browser, project, or source materials on the other.

Compatibility with smartphones and desktop modes

The AT156 model supports connection with smartphones that support operating modes such as Samsung DeX, Huawei EMUI Desktop, or TNT. Once connected, the monitor can serve as a larger workspace, making it more convenient to type, browse files, watch multimedia, or use apps. This is a great solution when you want to use your phone as a simple mobile computer without having to carry a laptop.

USB-C, mini HDMI, and PD power

The monitor features USB-C ports for data transfer, USB-C PD for power, mini HDMI, and a 3.5mm audio output. This allows you to connect it to many types of devices, including laptops, smartphones, consoles, computers, and media players with compatible ports. PD charging support in the 5–20 V range allows for more convenient powering of the monitor, and the included cables make it easy to start working right out of the box.

Slim design and included carrying case

The housing measures 357 × 225 × 10 mm, and its slim design makes it easy to fit the monitor in a bag alongside a laptop. The unit itself weighs 637 g, while with the case it weighs about 1021 g, so the set remains easy to carry. The included case protects the monitor during transport and can serve as a stand, which makes it more convenient to use the screen in various locations.

Included in the set

- ZEUSLAP AT156 15.6" portable monitor
- Case with stand function
- Charger
- USB-A to USB-C cable x 2
- Mini HDMI to HDMI cable
- USB-C to USB-C cable
- User manual
