

Flytec V803 12000mAh bait boat

Model: V803-Basic 12000mah

Manufacturer: FLYTEC

EAN: 5905156102118

Product Code: 1096429

R3,536

Flytec V803 12000mAh bait boat

The Flytec V803 is a bait boat designed for maximum control and efficiency while fishing. It offers precise control in every direction, stable navigation supported by a gyroscope, and the ability to maintain a constant speed. Four independently controlled bait chambers allow for flexible baiting planning, and the dual antenna system offers a reliable signal and long range. The model is equipped with an efficient dual power supply system, two speed modes, an easy-to-read remote control with a color screen, and extensive lighting for working after dark. Additional features, such as precise rig release and the option to add an echo sounder, make the Flytec V803 a versatile tool for demanding anglers.

Stable control and intelligent navigation

The V803 offers complete freedom of maneuvering—forward and backward movement and precise left and right turns make the boat perfect for various bodies of water. A built-in, high-precision—

gyroscope automatically corrects course deviations, ensuring a stable course even in wind or waves. The constant speed function makes it easy to maintain a straight course and reduces the load on the operator, while four spacious bait chambers with a total capacity of up to 3 kg allow for accurate and varied baiting.

Four independent bait chambers

One of the key advantages of the Flytec V803 is its system of four independently controlled bait chambers. Each chamber can be opened separately, allowing for precise bait placement and adaptation of your strategy to different fish species and fishing conditions. This gives you complete control over your baiting without compromise.

Range up to 500 meters and reliable connectivity

The use of dual 2.4G antennas with enhanced gain ensures a stable signal and high resistance to interference. This allows the boat to be controlled from a distance of up to 500 meters, giving you complete freedom of operation on large bodies of water. The remote control with a color HD display provides a clear view of parameters in real time, and the backlit buttons ensure convenient operation even after dark.

Long operating time and intelligent power management

The Flytec V803 is equipped with a dual power supply system that supports two batteries simultaneously, ensuring uninterrupted operation. This solution significantly extends the operating time – up to 8 hours on a single charge. Intelligent power management increases reliability during long fishing sessions and allows you to focus solely on fishing.

Visibility and safety after dark

The advanced lighting system makes nighttime boating safe and comfortable. Bright navigation lights at the bow facilitate orientation on the water, and rear signal lights clearly show the direction of travel. There are two lighting modes (steady or flashing) to suit the current conditions.

Power, smoothness, and two speed modes

The dual motor system ensures high performance and smooth maneuvering. The ability to switch between two speed modes—slow and fast—allows you to adjust your sailing to the situation, and large propellers with an anti-tangle design ensure efficient operation even in more difficult terrain.

Precise casting

The boat is equipped with a hook mounted on the stern, which allows you to cast your line and fishing line accurately in the desired location. This solution significantly increases the precision and effectiveness of fishing. The design is also adapted for expansion with a wireless echo sounder (available separately), which allows you to locate fish in real time and plan your fishing even better.

Included in the set

- Boat
- Boat battery
- Antenna x2
- Remote control
- USB cable
- Type C charging cable for remote control
- Hanging cord
- Spare propeller screws x2
- User manual

Manufacturer	Flytec
Model	V803
Color	red
Material	ABS plastic and electronic parts
Control range	500 m
Speed	250 m/min
Motor	dual 390 motor
Controiier battery	3.7 V 2000 mAh (built-in lithium battery)

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Boat battery	7.4 V 12000 mAh
Charging time	8 hours
Control time	4 hours
Load capacity	3000 g

Product dimensions (L x W x H) 55 x 26.8 x 20 cm

Weight 2356 g

Gross weight: 3290, Box length: 57,50, Box width: 33,00, Box height: 26,00, Net weight: 2360, GPSR
