YEELIGHT Bedside D1 Matter Smart Night Light

The YEELIGHT Bedside D1 Matter smart night light is a modern 11 W LED light that combines an elegant design with advanced smart home features. It offers a full palette of 16 million colors, color temperature adjustment ranging from 2700 to 6500 K, smooth brightness control, and a maximum luminous flux of 480 lm. Thanks to its support for the Matter standard and Thread communication, it seamlessly integrates with Apple Home, Google Home, Amazon Alexa, and Samsung SmartThings, providing convenient voice and app-based control. The lamp features an intuitive touch panel, a Moonlight mode with a brightness of just 2 lm, and a uniformly lit shade that creates a pleasant atmosphere for both relaxation and everyday use.

16 million colors and adjustable white light for every occasion

The YEELIGHT Bedside D1 Matter lets you set the right mood regardless of the time of day or what you're doing. The lamp offers up to 16 million colors, so you can tailor the lighting for relaxation, watching movies, spending time with family, or unwinding in the evening. Additionally, the adjustable color temperature—ranging from a warm 2700 K to a cool 6500 K—lets you change the character of the light with a single gesture. Warm light helps you wind down before bed, while cooler light is ideal for reading, studying, or work that requires greater concentration.

Smooth brightness control and a gentle night mode

The lamp features stepless brightness control, allowing you to precisely adjust the light intensity to suit your needs. There's no need to choose from a few preset levels—simply set the brightness to exactly what feels most comfortable. An additional feature is the Moonlight mode, with a brightness of just 2 lumens, which provides subtle lighting at night. Such soft light doesn't strain the eyes and makes it easier to move around the room without waking up your family members.

Even Lighting and a Modern Look

The lampshade is designed to evenly diffuse light across its entire surface. As a result, the lighting is soft, easy on the eyes, and free of unsightly light spots. The base and control panel remain unlit, which further emphasizes the device's minimalist design. Its compact dimensions of 200 × 140 mm mean the lamp fits easily on a nightstand, dresser, or desk.

Intuitive Touch Panel

Operating the YEELIGHT Bedside D1 Matter is quick and convenient thanks to the touch panel located on the front of the housing. A short press turns the lamp on or off, while a longer press activates the delayed-off function. You can also use the panel to change colors, switch lighting modes, and smoothly adjust the brightness. This ensures that the most important functions are always at your fingertips, even without using your phone.

Smart Control via the Matter Standard

Support for the Matter standard allows the lamp to easily integrate into a modern smart home ecosystem. Communication based on Thread technology ensures stable and fast device operation,

as well as efficient data exchange with other components of the smart home system. The lamp is compatible with Apple Home, Google Home, Amazon Alexa, and Samsung SmartThings, so you can control it both by voice and via a mobile app. This allows for convenient lighting management from anywhere and the creation of automations tailored to your daily routines.
