Tattu R-Line features an exceptional capacity-to-size ratio. It has a capacity of 1,800 mAh, and its compact size (77 x 38 x 53 mm) and light weight (288 g) make it ideal for FPV multirotors ranging in size from 100 to 180, providing them with unparalleled power and long flight times.

Outstanding power and safe charging

The Tattu R-Line battery offers an exceptional discharge capacity of 150C, providing enough power even during the most intense racing. Thanks to the fact that the battery was designed for professional FPV competitions, its performance will not fail even in extreme and dynamic moments, giving you full control over your machine.

Use of advanced technologies

The Tattu R-Line battery uses the highest quality raw materials from Japan and Korea, which guarantee its stability and longevity. The use of "stacking" technology allows for high energy density and lower internal resistance, resulting in long-lasting performance in any situation. The battery is also less prone to overheating, which contributes to safety and comfort.
