Product Code: 1101710

R2,236

YEELIGHT D1 Matter Desk Lamp

The YEELIGHT D1 Matter desk lamp is a modern LED light designed for work, study, and everyday use. It offers a light intensity of up to 1,500 lux, a luminous flux of 670 lm, color temperature adjustment in the range of 2,700–6,500 K, stepless brightness control, and a high color rendering index (Ra97), which ensures colors appear natural. The wide 60-centimeter head evenly illuminates a large area of the desk, and the forward-facing optical design reduces glare when working at a monitor. Support for the Matter standard and Thread technology ensures compatibility with Apple Home, Google Home, Amazon Alexa, and Samsung SmartThings, allowing for convenient control of the lamp as part of a smart home system.

Even lighting across the entire desk

The YEELIGHT D1 Matter is equipped with a wide, 60-centimeter lamp head that ensures even light distribution across the entire work surface. This ensures that your laptop, keyboard, documents, and

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. other accessories on your desk are all illuminated at the same time. With a maximum light intensity of 1,500 lux, the lamp is well-suited for demanding tasks such as studying, designing, or working with documents. The uniform light distribution minimizes the formation of darker spots, which translates to greater comfort during everyday use.

Eye Comfort During Long Work Sessions

The lamp's design uses optics that direct light forward, thereby reducing glare and light reflection off the monitor. The light is directed primarily onto the work surface rather than directly into the user's eyes. This solution enhances comfort during long hours of computer work, studying, or reading. Proper beam direction also allows for better use of the light's intensity without the need to set the brightness very high.

Light Adjustment Tailored to Various Applications

The lamp allows you to adjust the color temperature from 2700 K to 6500 K, making it easy to tailor the lighting to the task at hand. Warm light creates a pleasant atmosphere for relaxing or reading in the evening, while cooler light helps you concentrate while working or studying. The device also offers stepless brightness control, allowing you to precisely adjust the light intensity to the time of day and the conditions in the room. As a result, a single lamp works well for both office work and everyday activities performed at a desk.

Pre-set Lighting Modes

The YEELIGHT D1 Matter offers three factory-preset lighting profiles that let you quickly adjust the light to your current needs. Work Mode provides settings suitable for working on a computer and performing tasks that require concentration. Reading Mode is optimized for reading books and documents, while Leisure Mode uses warmer light that promotes rest and relaxation. These preset settings eliminate the need to manually adjust brightness and color temperature every time you change how you use the lamp.

High Color Accuracy

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. A color rendering index (CRI) of Ra97 ensures that illuminated objects retain their natural appearance and colors are accurately reproduced. This is particularly important during design, drawing, photography, or other tasks requiring precise color assessment. The high-quality light also makes reading and working with documents easier by improving their legibility. As a result, the lamp works well in both professional and home settings.

Smart Control with Matter

Support for the Matter standard ensures that the lamp works seamlessly with the most popular smart home systems. Thanks to Thread technology, communication is fast and stable, and device setup is smooth. The lamp can be controlled via the app or using voice assistants compatible with Apple Home, Google Home, Amazon Alexa, and Samsung SmartThings. This solution allows you to conveniently control the lighting without having to walk over to your desk.

Included in the set

- YEELIGHT D1 Matter desk lamp
- Base
- Vertical bracket
- AC adapter
- AC adapter with a set of interchangeable international plugs (EU, UK, US, AU standards)
- Mounting screw

Manufacturer	YEELIGHT
Model	D1 Matter
Model number	YP-0879
Rated power	11 W
Luminous flux:	670 lm
Maximum illuminance	up to 1500 lx

Color temperature	2700–6500 K
Dimming	stepless
Color rendering index	Ra97
Head width	600 mm
Lamp height	477 mm
Power supply	100–240 V~, 50–60 Hz
Connectivity	Thread
Smart Home standard	Matter
Compatibility	Apple Home, Google Home, Amazon Alexa, Samsung SmartThings
Additional features	Focus Mode (45 min on + 10 min off), Work Mode, Reading Mode, Leisure Mode, color temperature adjustment, glare-reducing design

Gross weight: 2020, Net weight: 1440, Box length: 61,50, Box width: 22,00, Box height: 8,50, GPSR
