

Darkflash DS900W computer case without fans (Black)

Model: DS900W_Black

Manufacturer: DARKFLASH

EAN: 4711527003295

Product Code: 1102425

R1,700

Darkflash DS900W computer case without fans (Black).

The Darkflash DS900W case combines modernistic design with high functionality - the panoramic glass without A-pillar (A-Pillar) strikingly exposes the interior, and the well-thought-out design ensures stability and easy installation. It supports up to 10 fans and 360mm cooling to ensure efficient heat dissipation. Dust filters protect components, and the large internal space allows for mounting high-performance components. A USB Type-C (Universal Serial Bus, a connector standard used to power or charge electronic devices, as well as transfer data) connector on the front ensures fast and seamless connectivity, while the aesthetically pleasing finish and sturdy construction make it a great choice for those looking to assemble a high-performance and modern PC setup.

Minimalist design with a panoramic view

The Darkflash DS900W is for those looking for a sleek, futuristic design combined with functionality. The woodgrain accent front and double-sided tempered glass construction give the case a unique style and provide a 270° panoramic view of components without a disruptive A-pillar, making the entire interior composition aesthetically pleasing and transparent. With Darkflash, you'll build a stylish gaming space while providing your computer components with maximum protection.

Stable design without compromises

The case is based on a mechanical structure, which is shaped like a closing bracket, which translates into greater rigidity and resistance to deformation. The lack of a classic A-pillar does not negatively affect stability - on the contrary, the whole structure is characterized by high load-bearing capacity and strength, which will be especially appreciated by users building high-performance sets with heavy graphics cards.

Powerful cooling without limits

The DS900W is designed for maximum thermal efficiency. Up to 10 120mm fans can be installed inside, as well as CPU (Central Processing Unit, CPU) cooling up to 170mm high, effectively keeping temperatures down even during heavy use. Additional vents and a metal mesh back panel increase airflow and improve cooling performance by up to 15% while reducing noise levels (10% reduction). This allows you to enjoy pleasant, quiet operation, whether you are playing more demanding titles or using advanced graphics programs.

Full protection against dust

The entire chassis has been protected from dust - it uses covers that effectively block particles, pollen and other debris from getting inside. This solution keeps the interior clean, which not only extends the life of components, but also makes them easier to maintain.

Thoughtful space for expansion

Inside, there is no shortage of space for large components. In the DS900W you can mount a graphics card of up to 425 mm in length, as well as a heatsink of up to 360 mm on top and 240 mm on the side. The case supports motherboard formats ATX (Advanced Technology eXtended, standard motherboard and computer case size), M-ATX (Micro Advanced Technology eXtended, motherboard and computer case size smaller than ATX) and ITX (Information Technology eXtended, compact motherboard and computer case format). In addition, 7 PCI (Peripheral Component Interconnect, a connector standard for expansion cards, such as graphics or sound cards) slots provide ample opportunity to expand the kit with more expansion cards. Darkflash thinks of the most demanding gamers who expect reliability from their hardware.

Easy access to the Type-C port

On the front of the case is a USB Type-C port, which offers fast data transfer (up to 10 Gbps) and convenient access for various electronic devices. This solution makes the case ready for current hardware standards, being always at your fingertips.

Functional details and solid finish

The Darkflash DS900W is equipped with anti-vibration trapezoidal feet, which increase the stability of the design and reduce vibrations. Inside you'll find room for two SSDs (Solid State Drive, solid state drive) and two HDDs (Hard Disk Drive, hard disk drive), and the clear interior layout easily accommodates the components you need, while maintaining order and good air circulation.

Included

- motherboard screws x18
- power supply screws x6
- hard drive screws x9
- copper post x3 (6 pieces pre-installed)
- fan cover
- clamp x5
- fan screws x12
- copper spacer
- HD audio support x2

- USB cap x3
- user manual

Manufacturer	Darkflash
Model	DS900W
Housing type	Midi Tower
Side panel	Tempered glass
Motherboard standard	ATX, ITX, M-ATX
Power supply standard	ATX, bottom mount
Slots for internal drives	4 (2 x 2.5", 2 x 3.5")
Expansion card slots	7
Max PSU length	360 mm on top; 240 mm on the side
Max length of graphics card	425 mm
Max height of CPU cooler	170 mm
Max number of fans	10
Fan mounting options	Top: 120 mm x3/140 mm x2; Side: 120 mm x3; Rear: 120 mm; Bottom: 120 mm x3
Water cooling mounting options	-
Number of fans installed	No fans included
Type of fans	No fans included
Buttons and controls	Power, Reset, LED
Connectors	Type-C x1, USB3.0 x1, USB2.0 x1, HD Audio
Material	0.5 mm SPCC
Color	Black
Height	454 mm
Width	218 mm
Depth	434 mm
