EcoFlow Alternator Charger XT60 Output Cable (1m)

Compatibility

The cable is compatible with EcoFlow or third-party portable power stations equipped with an XT60 input port.

If your vehicle starter battery or RV house battery operates at 24V, ensure the maximum voltage rating of the power station's XT60 input port exceeds 48V. Otherwise, the cable may not function properly.

Connection

Use the cable to connect the Portable Power Station Port of the charger with the XT60 input port of the power station.

Operation

With this cable, the charger only supports Charge Mode and offers a maximum output power of 500W (subject to the ratings of the XT60 input port).
