Magcubic HY320 Projector (White)

The Magcubic HY320 is a compact projector that combines native 1080p resolution, 4K support, a 12,000:1 contrast ratio, and a wide range of features in a compact, portable design. The device offers Wi-Fi, Bluetooth 5.0, screen mirroring, automatic keystone correction, 50-100% zoom, and the ability to rotate up to 180°. With support for images up to 150 inches and its compact size, it's perfect for use at home, while traveling, or for impromptu movie nights anywhere.

Full HD image and 4K support—more detail on the big screen

The projector displays images at a native resolution of 1080p, ensuring sharpness and rich detail. Support for 4K content enhances compatibility with modern video sources, allowing you to enjoy a wide variety of content without restrictions. Watch your favorite movies and TV shows with ease—with Magcubic in your own bedroom or living room, you'll feel like you're at the movies!

Natural Colors and High Contrast Ratio of 12,000:1

With 95% NTSC color gamut coverage and a contrast ratio of 12,000:1, the picture is more vibrant and realistic. Colors are vivid, and the differences between light and dark areas of the image become more visible, enhancing your video viewing experience. Support for HDR10+ further increases image dynamics and allows for better detail reproduction in demanding scenes.

Wireless Image Streaming - Quick Access to Content

The projector allows for easy image sharing from various devices thanks to the One Step Mirroring feature. It supports iOS, Android, Windows, and macOS, enabling you to quickly stream content from a smartphone, laptop, or tablet. Additionally, support for AirPlay and Miracast simplifies wireless connectivity and eliminates the need for cables.

Stable connectivity and compatibility with TV sticks

Built-in Wi-Fi enables seamless use of wireless features and streaming, while Bluetooth 5.0 lets you easily connect headphones or external speakers. This allows you to tailor your projector experience to your needs—both at home and on the go. Additionally, the projector is compatible with TV sticks, making it even easier to watch your favorite content.

An image tailored to your expectations

The projector features automatic keystone correction, which ensures the correct image proportions without the need for manual adjustment. Meanwhile, the 50–100% zoom function allows you to adjust the projection size to fit the space without changing the device's settings. This feature simplifies setup and speeds up preparation for projection. What's more, the projector features Manual Focus, which allows you to precisely adjust the focus to the projection distance. This lets you quickly achieve a clear image regardless of the device's position and the size of the projection surface.

Flexible Placement Thanks to 180° Rotation

The ability to adjust the tilt angle up to 180° allows you to project the image not only onto a wall but also, for example, onto the ceiling. This means you can watch movies in bed, on the living room couch, or on a blanket in the garden, adjusting the projector’s settings to suit different scenarios without having to move it.

Extra-large screen—home theater anywhere

The projector can produce an image ranging from approximately 30 to 150 inches in either 16:9 or 4:3 aspect ratios, giving you great flexibility in adapting it to your space and personal preferences. Whether you’re watching a movie, playing a game, or giving a presentation, you can easily create a large screen tailored to the situation.

Manufacturer	Magcubic
Model	HY320W
Color	White
Max. Brightness	300 ANSI
Max. Native Resolution	1080p
Signal Support	Up to 4K
